

National Institute of Food and Agriculture

Childhood Obesity Prevention RFA Integrated
Approaches to Prevent Childhood Obesity

We particularly invite input on the following challenges:

- Ensuring that the current AFRI Childhood Obesity Prevention program science priorities include an appropriate spectrum of Overweight and Obesity Prevention and Health Promotion research.
 - Identifying emerging science that is NOT included in the current AFRI Childhood Obesity Prevention RFA.
 - Identifying new Research, Education, & Extension priorities stakeholders would like to see added to future AFRI Childhood Obesity Prevention RFAs.
 - Ensuring that AFRI Childhood Obesity Prevention RFAs are responsive to changes in the profession.
 - Deciding what the future direction of the AFRI Childhood Obesity Prevention program should be.
-
