Agriculture and Food Research Initiative
Competitive Grants Program

Modifications to the RFA are in RED

Childhood Obesity Prevention Challenge Area

FY 2015 Request for Applications

APPLICATION DEADLINE: April 30, 2015
NATIONAL INSTITUTE OF FOOD AND AGRICULTURE; U.S. DEPARTMENT OF AGRICULTURE

AGRICULTURE AND FOOD RESEARCH INITIATIVE
COMPETITIVE GRANTS PROGRAM
CHILDHOOD OBESITY PREVENTION CHALLENGE AREA

INITIAL ANNOUNCEMENT

CATALOG OF FEDERAL DOMESTIC ASSISTANCE: This program is listed in the Catalog of Federal Domestic Assistance under 10.310.

DATES: Applications must be received by 5:00 p.m. Eastern Time on April 30, 2015. Applications received after this deadline will normally not be considered for funding (see Part IV, C. of this RFA). Comments regarding this Request for Applications (RFA) are requested within 6 months from the issuance of this notice. Comments received after that date will be considered to the extent practicable.

STAKEHOLDER INPUT: The National Institute of Food and Agriculture (NIFA) seeks your comments about this RFA. We will consider the comments when we develop the next RFA for the program, if applicable, and we’ll use them to meet the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). Submit written stakeholder comments by the deadline set forth in the DATES portion of this Notice via e-mail to: Policy@nifa.usda.gov. (This e-mail address is intended only for receiving comments regarding this RFA and not requesting information or forms.) In your comments, please state that you are responding to the Agriculture and Food Research Initiative Competitive Grants Program Childhood Obesity Prevention Challenge Area RFA.

As part of the National Institute of Food and Agriculture’s (NIFA) strategy to successfully implement the 2014 Farm Bill, NIFA is soliciting stakeholder input on NIFA’s centers of excellence strategy. Between January and March 2015 NIFA will hold webinars to collect stakeholder input about the centers of excellence strategy in fiscal year (FY) 2015. Upcoming dates for the webinars will be announced on the NIFA website. The full transcript of the webinars will also be available on the NIFA website. NIFA will also request to receive input through an advertised call-in number, fax and email. All comments and suggestions for the FY 2015 centers of excellence should be received by March 30, 2015.

EXECUTIVE SUMMARY: NIFA requests applications for the Agriculture and Food Research Initiative Childhood Obesity Prevention Challenge Area (COP) for fiscal year 2015 to achieve the long-term outcomes of reducing the prevalence of overweight and obesity among children and adolescents. Project types supported by AFRI within this Challenge Area will propose multi-function Integrated Research, Education, and Extension Projects, Food and Agricultural Science Enhancement (FASE) Grants, and conferences and/or workshops. This RFA identifies integrated and conference/workshop program objectives, eligibility criteria and application instructions for each project type. A successful project will include all three functions of the agricultural
knowledge system (i.e., research, education and extension) within a project, focused around a problem or issue. The amount available for support of this program in FY 2015 is approximately $6 million.

This notice identifies the objectives for projects, the eligibility criteria for projects and applicants, application forms and associated instructions needed to apply for a COP grant.

PART I—FUNDING OPPORTUNITY DESCRIPTION

A. Legislative Authority and Background

Section 7406 of the Food, Conservation and Energy Act of 2008 (FCEA) (Pub. L. 110-246) amends section 2(b) of the Competitive, Special, and Facilities Research Grant Act (7 U.S.C. 450i(b)) to authorize the Secretary of Agriculture to establish the Agriculture and Food Research Initiative (AFRI); a competitive grant program to provide funding for fundamental and applied research, education, and extension to address food and agricultural sciences. Grants shall be awarded to address priorities in United States agriculture in the following areas:

1. Plant health and production and plant products;
2. Animal health and production and animal products;
3. Food safety, nutrition, and health;
4. Renewable energy, natural resources, and environment;
5. Agriculture systems and technology; and
6. Agriculture economics and rural communities.

To the maximum extent practicable, the National Institute of Food and Agriculture (NIFA), in coordination with the Under Secretary for Research, Education, and Economics (REE), will make grants for high priority research, education, and extension, taking into consideration, when available, the determinations made by the National Agricultural Research, Extension, Education, and Economics Advisory Board (NAREEEAB) pursuant to section 2(b)(10) of the Competitive, Special, and Facilities Research Grant Act (7 U.S.C. 450i(b)(10)), as amended. The authority to carry out this program has been delegated to NIFA through the Under Secretary for REE.

B. Purpose and Priorities

AFRI research, education, and Extension grants address key problems of agricultural sustainability at national, regional, and multi-state levels. Issues include farm efficiency and profitability, ranching, renewable energy, forestry (both urban and agroforestry), aquaculture, rural communities and entrepreneurship, human nutrition, food safety, biotechnology, and conventional breeding. Through these grants, AFRI advances knowledge in both fundamental and applied sciences important to agriculture. The grants also allow AFRI to support education and Extension activities that deliver science-based knowledge to people, allowing them to make informed practical decisions. Research, Education, Extension, and Integrated programs must increase agricultural and natural resource sustainability. The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA) defines "sustainable agriculture" as an integrated system of plant and animal production practices with site-specific applications that will, over time, achieve the following goals:

1. Satisfy human food and fiber needs;
2. Enhance environmental quality and the natural resource base upon which the agricultural economy depends;
3. Make the most efficient use of nonrenewable resources and on-farm resources and integrate, where appropriate, natural biological cycles and controls;
4. Sustain the economic viability of farm operations; and
5. Enhance the quality of life for farmers and the society as a whole.

Progress in achieving these goals requires the development of robust systems that adapt to and continue to function in the face of stresses, are productive, use resources efficiently, and balance all the goals across all scales of farms and enterprises.

AFRI promotes advances in U.S. agriculture and forestry. Agricultural research, however, is increasingly worldwide in scope and reach and we encourage proposals that are broadly impactful toward reducing global food insecurity. Project proposals submitted to AFRI’s Foundational or Challenge Area programs may include international partnerships or engagement as appropriate. Applicants must keep in mind that while NIFA-supported international activities may contribute to global food security as described in the U.S. Government’s Feed the Future global food security initiative (www.feedthefuture.gov), any international activity proposed for funding by AFRI (such as partnerships, exchanges, training, trips, etc.), must support AFRI’s goals for U.S. agriculture. Applicants must clearly describe and demonstrate how proposed international activities will contribute to and support advances in American agriculture. If international activities are proposed, applicants must describe indicators that will be used to assess those activities. Appropriate indicators include but are not limited to those posted at the U.S. Government's Feed the Future global food security initiative website (www.feedthefuture.gov/resource/feed-future-monitoring-and-evaluation-faqs). The contact for questions regarding global engagement is Michael McGirr (mmcgirr@nifa.usda.gov) or (202) 205-3739.

The Childhood Obesity Prevention Challenge Area (COP) RFA encourages projects that develop content and programs suitable for delivery through the Cooperative Extension System’s eXtension Initiative. You may use funds to contribute to existing Communities of Practice (CoP)/Learning Networks (LN) or to form a new Learning Network(s) focused on childhood obesity. Projects must align with the eXtension vision, mission, and values. You must have a letter of acknowledgement from eXtension; you may also need a letter of support from one or more of the Communities of Practice. For detailed guidance on how to partner with eXtension, go to http://create.extension.org/node/2057.

Stakeholder Input on Childhood Obesity Prevention
For information on stakeholder input related to AFRI and the Food Security program, please visit http://www.nifa.usda.gov/funding/afri/afri.html.

The AFRI Childhood Obesity Prevention RFA focuses on the number one nutrition-related problem in the United States. According to the Centers for Disease Control and Prevention (CDC), no state met the country's Healthy People 2010 goal to lower obesity rates to 15 percent of their population. Nine states had an obesity rate of 30 percent or higher in 2009. In comparison, no state had an obesity rate of 30 percent or more in 2000 as indicated within this link – http://www.cdc.gov/obesity/data/trends.html#State?s_cid=govD_dnpao_041. The breadth of potential research topics in nutrition is so broad and the available funding so limited that AFRI
must prioritize. It is unlikely that there is a single topic or combination of topics that would be as compelling or have the potential impact as those in the current challenge area in obesity prevention. While NIFA recognizes the benefits of basic research, the trend in this RFA has been to focus on finding effective interventions to prevent obesity through applied research; translational research; and integrated research, education, and extension projects that can result in actionable strategies.

The direction of AFRI in 2015 encourages a variety of project types to address the problem of childhood obesity–multi-function Integrated Research, Education, and Extension projects that emphasize health disparities and cultural influences. The FY 2015 AFRI Childhood Obesity Prevention RFA calls for a focus on behavioral and environmental approaches to obesity prevention in children, but the particular issues to be addressed and how to address them will be developed by the investigator(s). It is intended that the focus of the Childhood Obesity Prevention RFA will not change through 2015. We anticipate that the age group will remain between ages 2 and 19 years.

**Childhood Obesity Prevention Challenge Area**

The Childhood Obesity Prevention RFA focuses on the societal challenge to end child obesity. In the Childhood Obesity Prevention Challenge Area RFA, specific program areas are designed to achieve the long-term outcome of reducing the prevalence of overweight and obesity among children and adolescents. Project types supported by AFRI within this RFA include multi-function Integrated Research, Education, and Extension projects and FASE grants. NIFA may also solicit applications for AFRI funds through other announcements, including supplemental AFRI RFAs or RFAs issued in conjunction with other federal agencies. Such announcements will be made public in the same manner as this announcement. Other sources of NIFA funding for work relevant to the Childhood Obesity Challenge Area can be found at [www.nifa.usda.gov/afri](http://www.nifa.usda.gov/afri).

**Background**

This crosscutting program addresses the priority of childhood obesity prevention. Obesity is the number one nutritional problem in America. According to the National Health and Nutrition Examination Survey administered by the U.S. Centers for Disease Control and Prevention, prevalence rates for overweight and obesity in children and adolescents have tripled in the past 30 years. In 2011 - 2012 almost 17% of children and adolescents aged 2–19 years were obese (defined as having a Body Mass Index above the 95th percentile of the sex-specific growth chart). Low income children and adolescents are more likely to be obese than their higher income counterparts, but the relationship is not consistent across race and ethnicity groups [http://www.cdc.gov/obesity/data/childhood.html](http://www.cdc.gov/obesity/data/childhood.html).

The prevalence of obesity among children aged 2 to 5 years decreased significantly from 13.9% in 2003-2004 to 8.4% in 2011-2012. At the same time, the U.S. food supply contains an abundant amount of foods that are high in energy with appealing taste, but which are low in nutrient content. Food is an integral part of the process that leads to obesity and USDA has a unique responsibility for the food systems in the United States.
The Secretary of Agriculture and NIFA are committed to preventive nutrition and physical activity strategies that will reduce obesity and related chronic diseases, and thereby lower healthcare costs. The goal of these strategies is to improve the health and nutrition of America’s children.

The AFRI Childhood Obesity Prevention Challenge Area directly aligns with the USDA Strategic Plan (http://intranet.nifa.usda.gov/groups/OfficesUnits/OA/PA/USDA%20Strategic%20Plan.pdf) and specifically addresses Strategic Goal 4: Ensure that all of America’s children have access to safe, nutritious, and balanced meals. It also directly aligns with the Research, Education, and Economics Action Plan (http://www.ree.usda.gov/ree/news/USDA_REE_Action_Plan_02-2012_2.pdf) and specifically addresses Goal 4: Nutrition and Childhood Obesity and builds the evidence base for food-based and physical activity strategies and develops effective education/extension translational activities to promote health and reduce malnutrition and obesity in children and high-risk populations. The AFRI Childhood Obesity Prevention Challenge Area also directly aligns with the NIFA Strategic Plan (http://nifa.usda.gov/about/pdfs/strat_plan_2014.pdf) and specifically addresses Sub-Goal 1.5: Combat childhood obesity by ensuring the availability of affordable, nutritious food and providing individuals and families science-based nutritional guidance.

To meet these identified needs, the long-term outcome of the Childhood Obesity Prevention Challenge Area is to reduce the prevalence of overweight and obesity among children and adolescents ages 2–19 years. Projects are expected to address the stated Program Area Priority, which collectively contributes to the achievement of the following goals:

- Generation of new knowledge about behavioral, social, cultural, and environmental factors that influence excessive weight gain by children and adolescents.
- Development of effective behavioral, social, and environmental interventions to increase dietary intakes of fruits and vegetables; increase the variety of vegetables in the diet and decrease dietary intakes of foods high in solid fats and added sugars; increase the number of children who meet guidelines for television viewing and computer use; increase physical activity in children; and ultimately to decrease the proportion of children and adolescents who are overweight or obese. The development of new, more effective evaluation tools may be necessary.
- Expansion of interventions proven effective and assessment of their impact.
- An increase in the number of parents, caretakers, educators, practitioners, and researchers who receive the training and effectively model behaviors necessary to address the complex problem of childhood obesity prevention.

In order to achieve these program goals, the Childhood Obesity Prevention Challenge Area will address several focused objectives. In FY 2011, pre-adolescent and early adolescent children (ages 9–14 years) were targeted. In FY 2012, adolescent’s ages 15–19 years were targeted. Children and adolescents ages 2–19 years will be targeted in FY2015. Because the goals of the AFRI Childhood Obesity Prevention Challenge Area include bringing about behavior change as well as improving knowledge, in FY 2015 this Challenge Area is only accepting applications for
integrated research, education, and Extension projects. A successful integrated project will include the three functions of the agricultural knowledge system (i.e., research, education, and Extension) within a project, focused around a problem or issue. A project is optimally integrated if the components complement one another and are truly necessary for the ultimate success of the project or program. For more information on Integrated Project proposals see Part II, C. For eligibility requirements for Integrated Projects, see Part III, A.

C. Program Area Description

I. Integrated Approaches to Prevent Childhood Obesity
   Program Area Code – A2101
   Application Deadline – April 30, 2015 (5:00 p.m., Eastern Time).
   Applications submitted after the deadline will not be accepted.

   Proposed Budget Requests –
   - Standard grants must not exceed $1.0 million per year (including indirect costs) for project periods of up to 5 years ($5 million total per project). NIFA anticipates making 1 new standard award.
   - Conference and Food and Agricultural Science Enhancement (FASE) Grants must adhere to the guidelines outlined beginning in Part II, D.
   - Requests exceeding the budgetary guidelines will not be reviewed.

   Requested Project Type – Integrated Projects
   Requested Grant Type – Standard, Conference and FASE Grants
   Program Area Priority Contact – Dr. Deirdra Chester (202) 401-5178 or dnchester@nifa.usda.gov and Dr. Jane Clary Loveless (202) 720-3891 or jclary@nifa.usda.gov

II. Integrated Approaches to Prevent Childhood Obesity
   Program Area Code – A2111
   Application Deadline – April 30, 2015 (5:00 p.m., Eastern Time).
   Applications submitted after the deadline will not be accepted.

   Proposed Budget Requests –
   - Standard grants must not exceed $200,000 per year (including indirect costs) for project periods of up to 5 years ($1 million total per project). NIFA anticipates making up to 2 new standard awards.
   - Requests exceeding the budgetary guidelines will not be reviewed.

   Requested Project Type – Integrated Projects
   Requested Grant Type – Standard
   Program Area Priority Contact – Dr. Deirdra Chester (202) 401-5178 or dnchester@nifa.usda.gov and Dr. Jane Clary Loveless (202) 720-3891 or jclary@nifa.usda.gov
Program Area Priority – Applicants must address the following:

Generate new knowledge of the behavioral (not metabolic), social, cultural, and/or environmental factors, including food environment, that influence childhood obesity and use this information to develop and implement effective family, peer, community, and/or school-based interventions for preventing overweight and obesity and promoting healthy behaviors in children and adolescents (ages 2–19 years). This knowledge should have a strong emphasis on health literacy and health disparities. Behavior should be defined in a broad sense to include individual patterns of behavior and how individuals respond to others, the environment, and policy. Note that this program focuses on prevention of weight gain and will not fund projects to promote weight loss.

Other program requirements:

- All applications must adhere to the requirements beginning in Part IV.
- Applications from and collaborations with Minority-Serving Institutions, USDA Experimental Program for Stimulating Competitive Research (EPSCoR) institutions and/or small or mid-sized institutions that historically have not been as competitive are strongly encouraged.
- High priority will be given to projects that involve populations eligible for USDA nutrition education and food assistance programs (e.g., Expanded Food and Nutrition Education Program (EFNEP), Supplemental Nutrition Assistance Program (SNAP), Child Nutrition Programs, etc). The rationale for the selection of any population for intervention should be documented.
- High priority will also be given to projects involving the measurement of food loss and plate waste.
- It is understood that some projects may require the development and testing of new assessment tools.
- Because food is an integral part of the development of obesity, all projects should address some aspect of food consumption or food access.
- Because obesity is such a multifaceted problem, it is expected that the project team will have appropriate training and experience in multiple disciplines. Nutrition expertise is essential.
- Projects are expected to lead to measurable, documented changes in learning, actions or conditions in relation to obesity prevention.
- Applications addressing interventions for weight loss or that target audiences other than children ages 2-19 years (except as noted above) are not suitable for submission under this priority and will not be reviewed.

AFRI encourages projects that develop content and programs suitable for delivery through the Cooperative Extension System’s eXtension Initiative. You may use funds to contribute to existing Communities of Practice (CoP) or to form a new CoP focused on food loss, food recovery, or food recycle. Projects must align with the eXtension vision, mission, and values. You must have a letter of acknowledgement from eXtension; you may also need a letter of support from one or more of the Communities of Practice. For detailed guidance on how to partner with eXtension, go to http://create.extension.org/node/2057.
III. Supplemental Nutrition Assistance Program and Expanded Food and Nutrition Education Program (SNAP & EFNEP): Nutrition Education and Obesity Prevention: Regional Centers of Excellence (RNECE)

Program Area Code – A2151
Application Deadline – April 30, 2015 (5:00 p.m., Eastern Time).
Applications submitted after the deadline will not be accepted.

Proposed Budget Requests –
- Standard grants must not exceed $600,000 each (including indirect costs), for project periods of up to 2 years. NIFA anticipates making up to 2 new standard awards ($1,200,000 total). The continuation applications for the RNECE program will be solicited and funded under a separate continuation RFA.
- Supplemental standard grants must not exceed $160,000 (including indirect costs for project periods of up to 2 years. NIFA anticipates making up to 4 supplemental standard grants not exceed $160,000, each (including indirect costs), for project periods of up to 2 years ($640,000 total).
- Cooperative agreement grant must not exceed $160,000 (including indirect costs for project period of up to 2 years. NIFA anticipates making up to 1 supplemental cooperative agreement award.
- Requests exceeding the budgetary guidelines will not be reviewed.

Requested Project Type – Integrated Projects – Regional Centers
Requested Grant Type – New Projects – Standard Grants – 1) a new research center; and 2) a new signature research project
Requested Grant Type – Continuation Awards - Supplemental Standard Grants, and Cooperative Agreement Grants
Program Area Priority Contact – Dr. Helen Chipman (202) 720-8067 or hchipman@nifa.usda.gov

Program Area Priorities –
Projects are expected to augment the work of the SNAP and EFNEP: Nutrition Education and Obesity Prevention Regional Centers of Excellence (hereafter referred to as RNECE) Program, which is to: 1) Strengthen the evidence-base on effective nutrition education/obesity prevention programs for diverse population groups – i.e. identify and confirm what works; 2) Evaluate the long-term effectiveness of nutrition education/obesity prevention interventions for disadvantaged and underserved populations and opportunities for new research; and 3) Identify and create research collaborations and synergistic relationships among researchers and directors of EFNEP/SNAP-Ed and similar programs, universities, public health, and other implementers, and state and federal agencies.
Specifically, funds are being made available to:

1. Establish an additional SNAP & EFNEP Nutrition Education and Obesity Prevention Regional Center of Excellence, with a specific focus on the use of public health principles and interventions to promote healthy eating and prevent obesity. (new standard grant)
2. Conduct a signature research project with EFNEP and SNAP-Ed participants versus non-participants to assess similarities and differences in health outcomes (new standard grant);
3. Provide supplemental support to the RNECE program through its four existing Regional Centers and National Coordinating Center.

**General Expectations (applies to all applications)**

1. Applications should involve collaborations of multiple institutions/organizations and multiple states; applications and/or collaborations with Minority Serving Institutions are strongly encouraged.
2. Applications should show the direct involvement of nutrition/public health researchers. Collaborations with public health organizations, non-profit organizations, and/or other organizations that serve low-income, high-risk, underserved, and hard-to-reach audiences through EFNEP, SNAP-Ed, and similar programs are also strongly encouraged.

**Applications for the new regional center should also reflect a design that:**

1. Strengthens the evidence-base on effective public health approaches to promote healthy eating and prevent obesity for diverse low-income population groups – i.e. identify and confirm what works;
3. Focuses intervention development on improving behaviors and community conditions that make it difficult for low-income people and other underserved or hard-to-reach audiences to make healthy choices;
4. Translates research findings into interventions that can be successfully implemented and replicated in “real world” EFNEP and SNAP-Ed programs. Developed strategies and interventions should be transferable – i.e., usable by others across different geographic locales and can be tailored to community- specific characteristics and needs;
5. Supports SNAP-Ed/EFNEP implementation of RNECE-developed interventions with development and dissemination of tools such as guidance documents, websites, policy papers, and other instructional materials;

6. Evaluates the long-term effectiveness of public health approaches to promote nutrition and healthy eating for low-income populations served through SNAP and EFNEP; and

7. Identifies opportunities for new projects that leverage and extend successful interventions. These applications should include one or more of the following priorities for public health approaches in SNAP-Ed:

   - **Community Health Needs Assessments.** Development, testing, and refinement of tools and frameworks for community nutrition, physical activity, and obesity prevention needs assessments for SNAP-Ed program planning. Needs assessments identify the low-income population’s needs for improved access, appeal, and utilization of affordable, nutritious foods and free or low cost resources for physical activity. The project may include an inventory and review of existing tools, or the development of new tools for use in low-income communities to communicate results for program planning and stakeholder communications.

   - **Policy, Systems, and Environmental Changes Action Guides.** Create guidance manuals for professionals with step-by-step implementation tips for state and local practitioners working on the adoption and implementation of policy, systems, and environmental changes in SNAP-Ed and EFNEP. Guides can provide practical strategies for program leaders focused on allocation of resources, staffing, working with coalitions and partners, and managing resistance.

   - **Review of Public Health Approaches for Effectiveness.** Conduct evidence reviews of signature public health activities currently used or with the potential for use in SNAP-Ed and EFNEP. Develop research translation briefs or position papers that identify research-tested, practice-testing and emerging strategies for low-income obesity prevention programs and policies. Priority will be given to activities that are coordinated with an annual update of the **SNAP-Ed Strategies & Interventions: An Obesity Prevention Toolkit for States**, developed by USDA and the National Collaborative for Childhood Obesity Research.

   - **Amplifying Successful SNAP-Ed and EFNEP Public Health interventions.** Create a digital catalog of successful public health approaches in SNAP-Ed by interviewing and profiling real-world program examples that can be amplified and replicated.

   - **Maintain a Community of Practice for Public Health SNAP-Ed and EFNEP practitioners.** Add a public health emphasis to the eXtension Community Nutrition Education Community of Practice (CoP). Create opportunities for
collaboration, information sharing, and networking among the staff in the Regional Centers of Excellence as well as in State SNAP-Ed and EFNEP implementing agencies. The CoP can include an on-line space for sharing messages, and remote conferences and webinars designed to overcome barriers and identify solutions in implementing public health approaches.

Applications for the new signature research project (new standard grant) should also provide:

1. A comparison of individual factors or environmental settings for EFNEP and SNAP-Ed participants versus non-participants to assess similarities and differences in health outcomes;
2. Research design, implementation, analysis and plans to communicate results through research reports, case studies, and translation tools for practitioners; and
3. These research elements:
   o Participants/non-participants from areas with small, mid-sized, and large EFNEP/SNAP-Ed programs emphasizing urban and rural areas at high risk for obesity
   o Design which focuses on improving behaviors through quality nutrition education, social marketing, and changing policies, systems, and environments of the underserved or hard-to-reach audiences in “real-world” settings
   o Use of mediating behaviors (others levels of behavior may also be used, with adequate justification)
   o Use of Quantitative and qualitative indicators
   o Consideration of mid- to long-term effectiveness of interventions;
   o For EFNEP programs: Addressing at least two of the four core areas of the Community Nutrition Education (CNE) Logic Model (see http://www.nifa.usda.gov/nea/food/fsne/logicmodeloverview.pdf and EFNEP policy guidance): Diet quality and physical activity (required), Food Security (optional), Food Resource Management (optional), and/or Food Safety (optional).
   o For SNAP-Ed programs: Successfully incorporate a social-ecological framework (see Dietary Guidelines for Americans; http://www.health.gov/dietaryguidelines/2010.asp); and indicators from at least one of the following multi-level models for evaluation:

4. Connection to an existing RNECE Center, either directly or as evidenced by a letter of cooperation and support.

Applications for supplementing existing RNECEs should augment planned activities with additional formative research and/or intervention development that will help to integrate existing SNAP-Ed/EFNEP interventions, and interventions already under development by the
RNECE, across multiple levels of the social-ecological framework (individual, environmental settings, and/or sectors of influence). Specific interests may include one or more of the following:

1. **Nutrition Education and Public Health/PSE Synergies.** Combining and aligning education-focused strategies with community and public health approaches to create comprehensive, multi-level interventions that work synergistically to prevent obesity and improve nutrition;

2. **Understanding Barriers.** Conducting nationwide formative research among state SNAP-Ed agencies, Extension, nutrition networks, and current implementing agencies to identify barriers to program-policy appropriate public health/PSE approaches, and training needs to integrate PSE activities with other approaches;

3. **Nationwide Training.** Collaborating with and training State SNAP-Ed agencies, Extension, nutrition networks, and other current program delivery partners to design and implement integrated interventions that combine information transfer and education strategies, behavior-based promotion strategies, and policy environmental change that include PSE obesity prevention strategies and interventions;

4. **More Effective Evaluation.** Developing community health and population health evaluation approaches to more effectively assess:
   - similarities and differences in health outcomes as well as differences in the policies and environment in low-income communities or venues that shape these health outcomes; and
   - the comparative impacts of existing and emerging strategies on the dietary behaviors and related health outcomes of high-risk groups;

5. **Peer-to-Peer Education.** Developing and sharing best practices for community health workers, Promotoras de Salud, and members of the low-income communities, particularly racial and ethnic minorities, on the role they can play in delivering peer-to-peer education and serving as community ambassadors for making policy, systems, and environmental change. The project can also include examples of ways to train community members, including youth, to conduct needs assessments of their food and physical activity environmental and communicate results to decision-makers.

6. **Developing a Skilled Workforce.** Public health approaches require a new skill set that existing personnel may not yet have. Develop a training and/or certification program to ensure SNAP-Ed and EFNEP personnel can address policy, systems, and environmental changes in accordance with program policy in the settings where nutrition education is provided.

7. **Messaging Across the Socio-Ecological Model.** Many existing SNAP-Ed and EFNEP marketing and messaging campaigns are intended to reach the low-income household directly through a variety of media formats. The project can develop and test concepts and messages at the outer spheres of the socio-ecological model, including messaging to community leaders in K-12 education, media, agricultural, community design and safety, and industry about changes in nutrition and physical activity programs and policies.
8. **Networking Research.** Fostering research collaborations and synergistic relationships among researchers and directors of EFNEP/SNAP-Ed and similar programs, universities and other implementers, and state and federal agencies, with a special focus on high-risk low-income populations served by EFNEP and SNAP-Ed.

**Applications for supplementing the work of the National Coordination Center** augment current and planned activities, including:

1. Incorporation of new AFRI projects into the national data aggregation, evaluation, and dissemination systems and processes that are already under development (cooperative agreement).

2. Cooperation/coordination with organizations and programs represented by the regional centers;

3. Demonstration of communications, technology, and evaluation expertise and capacity to meet the program requirements, including, but not limited to data aggregation, evaluation, and dissemination, and transferability, back-up, and security of data.

**Other Program Requirements (applies to all applications):**

1. Applications must adhere to the requirements beginning in Part IV.

2. Applications must also comply with all RNECE requirements and complement or augment work that is currently underway at one or more regional centers (see http://www.nifa.usda.gov/funding/rfas/rncee.html).

3. Applicants must be part of an existing RNECE regional or national coordination center team and/or demonstrate the capacity and commitment to become a new RNECE regional center and/or work closely with one or more regional nutrition education centers and to collaborate and coordinate efforts with the national coordination center.

4. Applications must include two of the three functions of the agricultural knowledge system (research, education, and extension).

5. Applications must show that processes are transferable – can be used or extended by others.

6. Successfully incorporate a social-ecological framework (see - Dietary Guidelines for Americans; http://www.health.gov/dietaryguidelines/2010.asp); and

7. Complement and/or augment other RNECE projects.

AFRI encourages projects that develop content and programs suitable for delivery through the Cooperative Extension System’s eXtension Initiative. You may use funds to contribute to the Community Nutrition Education Communities of Practice (CoP). Projects must align with the eXtension vision, mission, and values. You must have a letter of acknowledgement from eXtension; and a letter of support from the Community Nutrition Education Community of
Practice. For detailed guidance on how to partner with eXtension, go to http://create.extension.org/node/2057. For information about the Community Nutrition Education Community of Practice, including a point of contact, go to http://www.extension.org/low_income_nutrition_education.

Additional Program Requirements:

- **Eligibility for the NEW projects**
  - Applications may only be submitted by land-grant institutions that have EFNEP programs, SNAP-Ed Implementing Agencies (http://snap.nal.usda.gov/state-contacts), and/or other non-profit organizations/agencies that have developed and/or delivered and/or evaluated similar low-income nutrition education/obesity prevention programs. Award recipients may subcontract to organizations not eligible to apply provided such organizations are necessary for the conduct of the project. Failure to meet an eligibility criterion by the time of application deadline may result in the application being excluded from consideration or, even though an application may be reviewed, will preclude NIFA from making an award.
  - Applications must include justification of eligibility to be considered for an award. Examples of eligibility would include: 1) being an 1862 or 1890 land-grant university, 2) having received SNAP-Ed funding from the state SNAP-Agency to implement SNAP-Ed in FY 2014; and/or 3) evidence that they are a non-profit organization/agency along with a description of the similar type of low-income nutrition education/obesity prevention program that they developed, delivered, and/or evaluated – including a program description, audience reached, action taken, and results achieved.

- **Eligibility for the CONTINUATION projects**
  - Supplemental Standard Grants: Colorado State University, Cornell University, Purdue University, University of North Carolina at Chapel Hill
  - Cooperative Agreement Award: University of Kentucky
PART II—AWARD INFORMATION

A. Available Funding

The amount available for NIFA support of this program in FY 2015 is approximately $6 million. There is no commitment by USDA to fund any particular application or to make a specific number of awards. The funds will be awarded through a grant agreement.

Awards issued as a result of this RFA will have designated the Automated Standard Applications for Payment System (ASAP), operated by the Department of Treasury’s Financial Management Service, as the payment system for funds. For more information see http://www.nifa.usda.gov/business/method_of_payment.html.

B. Types of Applications

In FY 2015, you may submit applications to the AFRI-COP Program as one of the following three types of requests:

(1) **New application.** This is a project application that has not been previously submitted to the AFRI Childhood Obesity Prevention Challenge Area Program. We will review all new applications competitively using the selection process and evaluation criteria described in Part V—Application Review Requirements.

(2) **Resubmitted application.** This is an application that had previously been submitted to the Program but not funded. Project Directors (PDs) must respond to the previous review panel summary (see Response to Previous Review, Part IV). Resubmitted applications must be received by the relevant due dates, will be evaluated in competition with other pending applications in appropriate area to which they are assigned, and will be reviewed according to the same evaluation criteria as new applications.

(3) **Renewal application.** This is a project application that requests additional funding for a project beyond the period that was approved in an original or amended award. Applications for renewed funding must contain the same information as required for new applications; they also must contain a Progress Report (see Project Narrative, Part IV). Renewal applications must be received by the relevant due dates, will be evaluated in competition with other pending applications in the area to which they are assigned, and will be reviewed according to the same evaluation criteria as new applications.

All awards will be made as continuation and standard awards. A continuation award is an award instrument by which the Department agrees to support a specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date: provided that 1) performance has been satisfactory, 2) appropriations are available for this purpose, and 3) continued support would be in the best interest of the Federal government and the public. Awardees are expected to participate in a rigorous post-award management activity to be determined by the Agency Contact at the formative stages of the
project. A standard award is an award instrument by which the Department agrees to support a specified level of effort for a predetermined project period without the announced intention of providing additional support at a future date. Conference, Sabbatical, Equipment, and Seed Grants will be made as standard awards.

C. Project Types

Applications must propose one of the project types specified with the Program Area(s) and select the appropriate grant type (see subpart D. of this section) for the application within the constraints of the grant types solicited. The project and grant types solicited in the AFRI Childhood Obesity Prevention Challenge Area are indicated in the table below and described in the Program Area Descriptions beginning in Part I, C.

**Integrated Research, Education, and Extension Projects**

A Multi-functional Integrated Project includes all three functions of the agricultural knowledge system (i.e., research, education, and Extension) within a project, focused around a problem or issue. The functions addressed in the project should be interwoven throughout the life of the project and act to complement and reinforce one another. The functions should be interdependent and necessary for the success of the project.

a) The proposed **Research** component of an integrated project should address knowledge gaps that are critical to the development of practices and programs to address the stated problem.

b) The proposed **Education** (teaching and teaching-related) component of an Integrated Project should develop human capital relevant to overall program goals for U.S. agriculture. An education or teaching activity is formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters, such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.
Educational activities may include any of the following:

- conducting classroom and laboratory instruction and practicum experience;
- faculty research internships for curricula development;
- cutting-edge agricultural science and technology curriculum development;
- innovation teaching methodologies;
- instructional materials development;
- education delivery systems;
- student experiential learning (student led-research, internships, externships, clinics);
- student learning styles and student-centered instruction;
- student recruitment and retention efforts;
- career planning materials and counseling;
- pedagogy;
- faculty development programs;
- development of modules for on-the-job training;
- providing knowledge and skills for professionals creating policy or transferring to the agriculture workforce;
- faculty and student exchanges; and
- student study abroad and international research opportunities relevant to overall program goals of U.S. agriculture.

Educational activities must show direct alignment with increasing technical competency in AFRI priority area(s) to ensure that U.S. agriculture remains globally competitive in the knowledge age.

Educational components must address one or two of the following key strategic actions:

- Train students for associate, baccalaureate, master’s or doctoral degrees; and/or
- Prepare K-12 teachers and higher education faculty to understand and present food and agricultural sciences.

These projects should synthesize and incorporate a wide range of the latest relevant research results. Note that routine use of graduate students and postdoctoral personnel to conduct research is not considered education for the purposes of this program.

The proposed Extension component of an Integrated Project should conduct programs and activities that deliver science-based knowledge and informal educational programs to people, enabling them to make practical decisions. Program delivery may range from community-based to national audiences and use communication methods from face-to-face to electronic or combinations thereof. Extension Projects may also include related matters, such as certification programs, in-service training, client recruitment and services, curriculum development, instructional materials and equipment, and innovative instructional methodologies appropriate to informal educational programs.

AFRI encourages projects that develop content and programs suitable for delivery through the Cooperative Extension System’s eXtension Initiative. Funds may be used to
contribute to existing Communities of Practice (CoP) or to form a new CoP. Projects must align with the eXtension vision, mission, and values. A letter of acknowledgement from eXtension is required, and a letter of support may be required from one or more of the CoPs. For detailed guidance on how to partner with eXtension, go to http://create.extension.org/node/2057.

Extension activities may address, but are not limited to, the following key strategic actions:

- Support informal education to increase food, agricultural, and health literacy of youth and adults;
- Promote science-based agricultural literacy by increasing understanding and use of food and agricultural science data, information, and programs;
- Build science-based capability in people to engage audiences and enable informed decision making;
- Develop new applications of instructional tools and curriculum structures that increase technical competency and ensure global competitiveness;
- Offer non-formal learning programs that increase accessibility to new audiences at the rate at which new ideas and technologies are tested and/or developed at the community-scale; and
- Develop programs that increase public knowledge and citizen engagement leading to actions that protect or enhance the nation’s food supply, agricultural productivity, environmental quality, community vitality, food security and/or public health and well-being.

These projects should synthesize and incorporate a wide range of the latest relevant research results. Please note that research-related activities, such as publication of papers or speaking at scientific meetings, are not considered Extension for the purposes of this program.

Integrated Projects aim to resolve today’s problems through the application of science- based knowledge and address needs identified by stakeholders. Integrated Projects clearly identify anticipated outcomes and have a plan for evaluating and documenting the success of the project. These projects should lead to measurable, documented changes in learning, actions, or conditions in an identified audience or stakeholder group.

Integrated Project applicants are encouraged to review www.nifa.usda.gov/funding/integrated/integrated.html for additional information on integrated programs, including tips for writing Integrated Project applications and an example of an integrated application.

D. Grant Type

Applications must propose one of the project types specified within the Program Areas and select the appropriate grant type for the application within the constraints of the grant types solicited.

1) Standard Grants

Standard Grants support targeted, original scientific Research, Education, Extension, or
2) **Coordinated Agricultural Project Grants**  
The Coordinated Agricultural Project (CAP) is a type of Research, Education, Extension, or Integrated Project that supports large-scale, multi-institutional, multi-million dollar projects to promote collaboration, open communication, and the exchange of information; reduce duplication of effort; and coordinate activities among individuals, institutions, States, and regions. Integrated CAP Grants address problems through multi-function projects that incorporate at least two of the three components of the agricultural knowledge system (i.e., research, extension, and education). Please note that there occasionally may be programs in which an Integrated CAP Grant is required to address all three components of the agricultural knowledge system. In a CAP, participants serve as a team that conducts targeted research, education, and/or extension in response to emerging or priority area(s) of national need. Applications articulate how a CAP will complement and/or link with existing programs or projects at the national level. A CAP contains the needed science-based expertise in research, education, and/or extension, as well as expertise from principal stakeholders and partners, to accomplish project goals and objectives. Applications should outline the potential of the project, the structure, coordination, and plan of implementation, and propose several research, education, and/or extension areas that will be evaluated during the study period.

3) **Conference Grants**  
Conference or Workshop Grants to support scientific meetings that bring together scientists to identify research, education, and extension needs, update information, or advance an area of science, are recognized as integral parts of scientific efforts. Support for a limited number of meetings covering subject matter encompassed by this solicitation will be considered for partial or, if modest, total support. Individual conference grants are not expected to exceed $50,000 for one year and are not renewable. Indirect costs are not permitted on Conference Grant awards.

4) **Food and Agricultural Science Enhancement Grants**  
Food and Agricultural Science Enhancement (FASE) Grants strengthen science capabilities in research, education, and extension programs. FASE Grants are designed to help institutions develop competitive projects, and to attract new scientists and educators into careers in high-priority areas of National need in agriculture, food, and environmental sciences. The FASE Grants provide support for Pre- and Postdoctoral Fellowships which will be solicited in a separate NIFA Fellowships Grant Program, New Investigators, and Strengthening Grants. Specific eligibility requirements for these grants are described below.

a. **Pre- and Postdoctoral Fellowship Grants**  
The current AFRI – Food, Agriculture, Natural Resources and Human Sciences Education and Literacy Initiative (ELI) was formerly known as AFRI NIFA Fellowships Grant Program to provide fellowships to undergraduate, predoctoral, and postdoctoral students in the agricultural sciences. The program goals are (1) to promote research and extension
experiential learning for undergraduates such that upon graduation they may enter the agriculture workforce with exceptional skills and (2) to prepare the next generation of scientists through doctoral and post-doctoral fellowships. Program information, including the anticipated release date, is available at www.nifa.usda.gov/funding/afri/afri.html.

b. **New Investigator Grants**

An individual who is beginning his/her career, does not have an extensive scientific publication record, and has less than five years postgraduate, career-track experience is encouraged to submit an application for a New Investigator Grant for research, education, and extension activities. The new investigator may not have received competitively awarded Federal research funds with the exception of pre- or postdoctoral grants or USDA NRI or AFRI Seed Grants. The application must contain documentation that lists all prior Federal support. The work proposed for New Investigator Grants must address a specific Program Area Priority described under Program Area Descriptions in Part I, C, and the application must be submitted directly to that Program Area by the designated deadline date.

c. **Strengthening Grants**

These funds are expected to enhance institutional capacity with the goal of leading to future funding in the project area, as well as strengthen the competitiveness of the investigator’s research, education, and extension activities. Strengthening Grants consist of Standard Grant types (both single-function and multi-function projects) as well as Seed Grants, Equipment Grants, and Sabbatical Grants. The work proposed for Strengthening Grants must address a specific Program Area Priority described under Program Area Descriptions in Part I, C, and the application must be submitted directly to that Program Area by the designated deadline date. All applications submitted for Strengthening Grants must fulfill the eligibility requirements described below.

1) **Strengthening Grant Eligibility**

Strengthening grants are limited to 1) small and mid-sized or minority-serving degree granting institutions that previously had limited institutional success for receiving Federal funds or 2) State Agricultural Experiment Stations or degree-granting institutions eligible for USDA Experimental Program for Stimulating Competitive Research (EPSCoR) funding and are eligible for reserved strengthening funds for Research, Education, Extension, and Integrated Project grants. See Figure 1 following Part VIII to assist with determining eligibility for Strengthening Grants.

2) **Strengthening Grant Eligibility Definitions**

a) **EPSCoR States**

Every year, NIFA determines the states that are eligible for USDA EPSCoR funding. This list includes states having a funding level no higher than the 39th percentile of all States based on a 3-year rolling average of AFRI funding levels, excluding FASE Strengthening funds granted to EPSCoR States and small-mid- sized and minority-serving degree-granting institutions. For FY 2015, the following States meet the
requirements for this category:

<table>
<thead>
<tr>
<th>FY 2015 USDA EPSCoR States</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alabama</td>
</tr>
<tr>
<td>Alaska</td>
</tr>
<tr>
<td>Connecticut</td>
</tr>
<tr>
<td>Idaho</td>
</tr>
<tr>
<td>Kentucky</td>
</tr>
<tr>
<td>Maine</td>
</tr>
<tr>
<td>Mississippi</td>
</tr>
</tbody>
</table>

Other entities eligible for USDA EPSCoR funds in FY 2015 include the following United States commonwealths, territories, possessions and their successors, and the District of Columbia:

<table>
<thead>
<tr>
<th>Other Entities eligible for USDA EPSCoR Funds</th>
</tr>
</thead>
<tbody>
<tr>
<td>American Samoa</td>
</tr>
<tr>
<td>District of Columbia</td>
</tr>
<tr>
<td>Guam</td>
</tr>
<tr>
<td>Micronesia</td>
</tr>
</tbody>
</table>

b) **Small and mid-sized institutions** are academic institutions with a current total enrollment of 17,500 or less, including graduate and undergraduate as well as full- and part-time students. An institution in this instance is an organization that possesses a significant degree of autonomy as defined by being independently accredited in the current version of the Higher Education Directory, published by Higher Education Publications, Inc., 1801 Robert Fulton Drive, Suite 340, Reston, Virginia 20191 (Phone: (888) 349-7715; [www.hepinc.com](http://www.hepinc.com)).

c) **Minority-serving institutions** are academic institutions whose enrollment of a single minority group or a combination of minority groups (as defined in Part VIII, H) exceeds 50 percent of the total enrollment, including graduate and undergraduate as well as full- and part-time students.

Applicants applying under this category should indicate the current percentage of applicable minority students enrolled at the institution in a cover letter. An institution in this instance is an organization that possesses a significant degree of autonomy as defined by being independently accredited in the current version of the Higher Education Directory, published by Higher Education Publications, Inc., 1801 Robert Fulton Drive, Suite 340, Reston, Virginia 20191 (Phone: (888) 349-7715; [www.hepinc.com](http://www.hepinc.com)). A list of post-secondary minority-serving institutions can be found at [www2.ed.gov/about/offices/list/ocr/edelite-minorityinst.html](http://www2.ed.gov/about/offices/list/ocr/edelite-minorityinst.html).
d) **Limited institutional success** is defined as institutions that are not among the most successful universities and colleges for receiving Federal funds for science and engineering research and development. See Table 1 following Part VIII for an alphabetical list of the most successful institutions.

All institutions grouped under one main campus as listed in Table 1 following Part VIII, unless located in an EPSCoR state, are excluded from eligibility for all strengthening funds. The institution may petition for an exemption to this rule as described in Part III. B.

3) **Strengthening Grant Types**

An individual applicant may submit only one of the following types of strengthening applications (Sabbatical Grant, Equipment Grant, or Seed Grant) as PD this fiscal year. Investigators are encouraged to contact the Program Area Priority Contact of the appropriate program area priority, regarding suitability of project topics to verify that their submission is appropriate to the program area priority. For Equipment Grants, investigators are also encouraged to contact the appropriate Program Area Priority Contact regarding appropriateness of requested equipment for topics within program area priority requirements.

a) **Coordinated Agricultural Projects (CAP)**

Refer to Part II, D. 1 for an explanation of CAP grants and refer to Part I, C for Program Area Description.

b) **Sabbatical Grants**

Sabbatical Grants are to provide an opportunity for faculty to enhance their research, education, and extension capabilities by funding sabbatical leaves. Collaborative arrangements are encouraged. Grants will be limited to one year of salary and funds for travel and supplies, where justified, and are not renewable.

NIFA also encourages and will support the concept of “mini-sabbaticals” for faculty and researchers desiring short-term training to learn new techniques that will improve their competitiveness. These short-term training opportunities generally follow all of the sabbatical requirements described beginning in Part IV, C, but for a shorter duration. These grants may be used to participate in short courses offered at various research institutions.

c) **Equipment Grants**

Equipment Grants are designed to strengthen the research, education, and extension capacity of institutions by funding the purchase of one major piece of equipment. These grants are not intended to replace requests for equipment in individual project applications. Rather, they are intended to help fund items of equipment that will upgrade infrastructure. Requests for computer equipment are allowed only if the equipment is to be used in an activity integral to the proposed project. Requests for computer equipment will not be permitted if the equipment will primarily serve as a word processor or perform administrative functions.
Each request shall be limited to one major piece of equipment within the cost range of $10,000-$250,000 and are not renewable. The amount of Federal funding requested shall not exceed 50 percent of the cost or $50,000, whichever is less. Grantees are required to match 100% of federal funds awarded from non-Federal sources. Unless a waiver is granted by NIFA using the criteria listed in Part III, C, it is the responsibility of the PD to secure required matching funds with non-Federal funds (see Part III, C) for more information. No installation, maintenance, warranty, or insurance expenses may be paid from these grants, nor may these costs be part of the matching funds. Indirect costs are not permitted on Equipment Grant awards.

d) Seed Grants
Seed Grants are to provide funds to enable investigators to collect preliminary data or perform other preliminary activities in preparation for applying for future grants from AFRI. The grants are not intended to fund stand-alone projects, but rather projects that will lead to further work applicable to one of the AFRI Program Areas. Seed Grant applications proposing an Integrated Project only need to include one of the three functions (research, education, extension) and justify how this Seed Grant will allow the applicant to become competitive for future Integrated Project funding.

Seed Grants are limited to a total of $150,000 (including indirect costs) for two year duration and are not renewable.

e) Strengthening Standard Grants
Standard Grant applications that meet the eligibility requirements for Strengthening Grants are eligible for reserved strengthening funds as a Strengthening Standard Grant. The eligibility requirements only apply to the lead PD and are not required for co-PD(s) associated with the project

E. Responsible and Ethical Conduct of Research

The responsible and ethical conduct of research (RCR) is critical for excellence, as well as public trust, in science and engineering. Consequently, we consider education in RCR essential to the preparation of future scientists. In accordance with sections 2, 3, and 8 of 7 CFR Part 3022, institutions that conduct USDA-funded extramural research must foster an atmosphere conducive to research integrity, bear primary responsibility for prevention and detection of research misconduct, and maintain and effectively communicate and train their staff regarding policies and procedures. In the event an application to NIFA results in an award, the Authorized Representative (AR) assures, through acceptance of the award that the institution will comply with the above requirements. Per award terms and conditions, grant recipients shall, upon request, make available to NIFA the policies, procedures, and to support the conduct of the training.

Note that the training referred to herein shall be either on-campus or off-campus training. The general content of the ethics training will, at a minimum, emphasize three key areas of research.
ethics: authorship and plagiarism, data and research integration, and reporting misconduct. Each institution will be responsible for developing its own training system, as schools will need flexibility to develop training tailored to their specific student needs. Grantees should consider the Collaborative Institutional Training Initiative (CITI) program for RCR (https://www.citiprogram.org/rcrpage.asp). Typically this RCR education addresses the topics of: Data Acquisition and Management - collection, accuracy, security, access; Authorship and Publication; Peer Review; Mentor/Trainee Responsibilities; Collaboration; Conflict of Interest; Research Misconduct; Human Subject Research; and Use of Animals in Research.
PART III—ELIGIBILITY INFORMATION

A. Eligible Applicants

(1) Research Projects
Eligible applicants for research projects include: 1) State Agricultural Experiment Stations; 2) colleges and universities (including junior colleges offering associate degrees or higher); 3) university research foundations; 4) other research institutions and organizations; 5) Federal agencies, 6) national laboratories; 7) private organizations or corporations; 8) individuals who are U.S. citizens, nationals, or permanent residents; and 9) any group consisting of 2 or more entities identified in 1) through 8). Eligible institutions do not include foreign and international organizations.

(2) Integrated Projects
Eligible applicants for Integrated Projects include: 1) colleges and universities; 2) 1994 Land-Grant Institutions; and (3) Hispanic-serving agricultural colleges and universities.

For Integrated Projects, the terms "college" and "university" mean an educational institution in any state which 1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate; 2) is legally authorized within such state to provide a program of education beyond secondary education; 3) provides an educational program for which a bachelor’s degree or any other higher degree is awarded; 4) is a public or other nonprofit institution; and 5) is accredited by a nationally recognized accrediting agency or association. A research foundation maintained by a college or university is eligible to receive an award under this program.

(3) Hispanic-serving Agricultural Colleges and Universities
Section 7101 of the Food, Conservation, and Energy Act of 2008 (Pub. L. 110-246) amended section 1404 of NARETPA (7 U.S.C. 3103) to create a definition for a new group of cooperating institutions: Hispanic-serving Agricultural Colleges and Universities (HSACUs). HSACUs are colleges and universities that qualify as Hispanic-serving Institutions (HSIs) and offer associate, bachelors, or other accredited degree programs in agriculture-related fields. HSACUs do not include 1862 land-grant institutions.

Pursuant to section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626), which authorized the Integrated Research, Education, and Extension Competitive Grant Program, all four-year HSIs are eligible to apply for integrated projects as identified in the FY 2015 AFRI RFA. Two-year HSIs may also be eligible to apply but only if the institution has been certified as a HSACU for the fiscal year in which funding is being provided.

A list of the institutions certified and therefore eligible to apply as HSACUs for grants under FY 2015 RFAs, including this RFA, will be made available at www.nifa.usda.gov/nea/education/in_focus/hispanic_if_hispanic_HSACU.html.
Institutions appearing on this list are granted HSACU certification by the Secretary for the period starting October 1, 2014, and ending September 30, 2015. Certifications are valid for FY 2015 only. Additional questions on HSACU eligibility can be emailed to hsacu@nifa.usda.gov.

(4) Food and Agricultural Science Enhancement Grants
The Food and Agricultural Science Enhancement (FASE) Grants have additional eligibility requirements. See Part II.D. 3 for details.

B. Request for Determination

If an applicant’s institution can be considered a minority-serving institution and wishes to be considered for a Strengthening Grant (as described in Part II, D. 3. c), but does not serve one or more of the minority groups specified in the Definitions section of this RFA (see Part VIII, H), the applicant must submit to NIFA, documentation supporting the request. This documentation must be submitted as part of the requestor’s the application package, and must be received by NIFA by the applicable program deadline. The Secretary of Agriculture or designated individual will determine whether the group or groups identified are eligible under this program.

The Request for Determination as a minority-serving institution must be attached with the final application. The following information must be provided in the order specified below:

1. A description of each minority group that is being submitted for determination;
2. Data or studies supporting this group’s designation as a minority group; and
3. Data indicating that enrollment of the minority group(s) exceeds 50 percent of the total enrollment at the academic institution, including graduate and undergraduate and full- and part-time students.

All institutions grouped under one main campus as listed in Table 1 following Part VIII, unless located in an EPSCoR state (listed in Part II, D. 3. c. 2 a.), are excluded from eligibility for all strengthening funds. However, if any campus within a multi-campus listing can provide information demonstrating that it is administratively independent or has an independent accreditation, then the institution may petition for an exemption to this rule and request eligibility for strengthening funds. The application must include a letter indicating how the institution is independent of the main campus, either through accreditation or administration. In addition, the letter should stipulate that the institution is eligible as a small and mid-sized or minority-serving institution due to enrollment and total federal funds received for science and engineering research and development. The letter must be signed by the Authorized Representative (AR) and the completed application.

C. Cost Sharing or Matching

If a funded applied Research and Integrated Projects are commodity-specific and not of national scope, the grant recipient is required to match the USDA funds awarded on a dollar-for-dollar basis from non-Federal sources with cash and/or in-kind contributions.
**For Equipment Grants:** The amount of Federal funds provided may not exceed 50 percent of the cost of the equipment acquired using funds from the grant, or $50,000, whichever is less. Grantees are required to match 100 percent of Federal funds awarded from non-Federal sources. The Secretary may waive all or part of the matching requirement if all three of the following criteria are met: 1) applicants must be a college, university, or research foundation maintained by a college or university that ranks in the lowest one third of such colleges, universities, and research foundations on the basis of Federal research funds received (see Table 2 following Part VIII for eligibility); 2) if the equipment to be acquired using funds from the grant costs not more than $25,000; and 3) has multiple uses within a single research project or is usable in more than one research project. If the institution believes it is eligible for the waiver for matching funds, the budget justification must include a letter signed by the institution’s AR stating this information.

**D. Centers of Excellence**

Pursuant to Section 7214 of the Agricultural Act of 2014 (Pub. L. 113-79), beginning in Fiscal Year 2015, for applicable competitive research and extension programs, NIFA will be recognizing and providing priority in the receipt of funding to applications from “centers of excellence” that have been established for purposes of carrying out research, extension, and education activities relating to the food and agricultural sciences. In July of 2014, NIFA held listening sessions and accepted written comments from stakeholders to inform NIFA’s implementation of the centers of excellence provision. Information from the webinars and a summary of the input gathered are available on NIFA’s website at [http://www.nifa.usda.gov/about/offices/legis/cntr_ex_webinar_documents.html](http://www.nifa.usda.gov/about/offices/legis/cntr_ex_webinar_documents.html)

A center of excellence is composed of 1 or more of the following entities that provide financial or in-kind support to the center of excellence. Therefore, an eligible applicant who wishes to be considered as a center of excellence must be one of the following entities that provides financial or in-kind support to the Center being proposed, as described in the grant application.

(A) State agricultural experiment stations;
(B) colleges and universities;
(C) university research foundations;
(D) other research institutions and organizations;
(E) Federal agencies;
(F) national laboratories;
(G) private organizations, foundations, or corporations;
(H) individuals; or
(I) any group consisting of 2 or more of the entities described in (A) through (H).

Only CAP grants and standard grant applicants may be considered for COE designation. See Part IV, B. of this RFA for additional requirements that eligible applicants must meet to be considered a center of excellence.
PART IV—APPLICATION AND SUBMISSION INFORMATION

A. Electronic Application Package

Only electronic applications may be submitted via Grants.gov to NIFA in response to this RFA. We urge you to submit early to the Grants.gov system. For an overview of the Grants.gov application process see http://www.grants.gov/web/grants/applicants/grant-application-process.html.

New Users of Grants.gov

Prior to preparing an application, we recommend that the Project Director/Principal Investigator (PD/PI) first contact an Authorized Representative (AR, also referred to as Authorized Organizational Representative or AOR) to determine if the organization is prepared to submit electronic applications through Grants.gov. If not (e.g., the institution/organization is new to the electronic grant application process through Grants.gov), then the one-time registration process must be completed PRIOR to submitting an application. It can take as long as 2 weeks to complete the registration process so it is critical to begin as soon as possible. In such situations, the AR should go to “Register” in the top right corner of the Grants.gov web page (or go to http://www.grants.gov/web/grants/register.html) for information on registering the institution/organization with Grants.gov. Part II.1. of the NIFA Grants.gov Application Guide contains detailed information regarding the registration process. Refer item 2. below to locate the “NIFA Grants.gov Application Guide”.

Steps to Obtain Application Package Materials

To receive application materials:

1. You must download and install a version of Adobe Reader compatible with Grants.gov to access, complete, and submit applications. For basic system requirements and download instructions, see http://www.grants.gov/web/grants/support/technical-support/software/adobe-reader-compatibility.html. Grants.gov has a test package that will help you determine whether your current version of Adobe Reader is compatible.

2. To obtain the application package from Grants.gov, go to http://www.grants.gov/web/grants/applicants/apply-for-grants.html. Under Step 1 click on “Download a Grant Application Package,” and enter the funding opportunity number USDA-NIFA-AFRI-004917 in the appropriate box and click “Download Package.” From the search results, click “Download” to access the application package.

Contained within the application package is the “NIFA Grants.gov Application Guide.” This guide contains an introduction and general Grants.gov instructions, information about how to use a Grant Application Package in Grants.gov, and instructions on how to complete the application forms.

If you require assistance to access the application package (e.g., downloading or navigating Adobe forms) or submitting the application, refer to resources available on
the Grants.gov website (http://www.grants.gov/web/grants/applicants/applicant-resources.html). Grants.gov assistance is also available at:

Grants.gov customer support
800-518-4726 Toll-Free or 606-545-5035
Business Hours: 24 hours a day, 7 days a week. Closed on federal holidays.
Email: support@grants.gov

Top 10 requested help topics (FAQs), Searchable knowledge base, self-service ticketing and ticket status, and live web chat (available 7 a.m. - 9 p.m. ET). Get help now!

Have the following information available when contacting Grants.gov:

- Funding Opportunity Number (FON)
- Program Area Number
- Name of agency you are applying to
- Specific area of concern

B. Content and Form of Application Submission

You should prepare electronic applications following Parts V and VI of the NIFA Grants.gov Application Guide. This guide is part of the corresponding application package (see Section A. of this Part). The following is additional information needed to prepare an application in response to this RFA. If there is discrepancy between the two documents, the information contained in this RFA is overriding.

Note the attachment requirements (e.g., PDF) in Part III section 3. of the guide. ANY PROPOSALS THAT ARE NON-COMPLIANT WITH THE REQUIREMENTS (e.g., content format, PDF file format, file name restrictions, and no password protected files) WILL BE AT RISK OF BEING EXCLUDED FROM NIFA REVIEW. Partial applications will be excluded from NIFA review. We will accept subsequent submissions of an application until close of business on the closing date in the RFA (see Part V, 2.1 of the NIFA Grants.gov Application Guide for further information).

For any questions related to the preparation of an application, review the NIFA Grants.gov Application Guide and the applicable RFA. If assistance is still needed for preparing application forms content, contact:
1. **SF 424 R&R Cover Sheet**
   Information related to the questions on this form is dealt with in detail in Part V, 2. of the NIFA Grants.gov Application Guide.

2. **SF 424 R&R Project/Performance Site Location(s)**
   Information related to the questions on this form is dealt with in detail in Part V, 3. of the NIFA Grants.gov Application Guide.

3. **R&R Other Project Information Form**
   Information related to the questions on this form is dealt with in detail in Part V, 4. of the NIFA Grants.gov Application Guide.

   a. **Field 7. Project Summary/Abstract.** The summary should also include the relevance of the project to the goals of COP. See Part V, 4.7 of NIFA Grants.gov Application Guide for further instructions and a link to a suggested template.

   b. **Field 8. Project Narrative.**

   For Standard, New Investigator, Coordinated Agricultural Project (CAP), Conference, Strengthening Standard, Strengthening CAP and Strengthening Conference Grant applications, the Project Narrative section may **not exceed a total of 18 pages** with 12-point font and line spacing not exceeding six lines of text per vertical inch, including all figures and tables.

   For Sabbatical, Equipment, and Seed Grant applications, the Project Narrative section may **not exceed a total of 7 pages** with 12-point font and line spacing not exceeding six lines of text per vertical inch, including all figures and tables.

   Each Project Narrative is expected to be complete; however, preprints (see Part IV, C. 4. g) related to the Project Narrative are allowed if they are directly germane to the proposed project. Information may not be appended to an application to circumvent page limitations prescribed for the Project Narrative.

   **Project Narrative Attachment must include all of the following:**

   1) **Response to Previous Review (if applicable)**
   This requirement only applies to Resubmitted Applications as described in Part II, B. The Project Narrative attachment should include two components: 1) a one-page response to the previous review panel summary titled “Response to Previous Review” included as the first page of the attachment and 2) the 7- or 18-page Project Narrative, as required (see Part IV, C. 4. c above). The one-page Response to Previous Review does not count against the 7- or 18-page limit of the Project Narrative.
2) Introduction  
Include a clear statement of the long-term goal(s) and supporting objectives of the proposed project. Summarize the body of knowledge or past activities that substantiate the need for the proposed project. Describe ongoing or recently completed activities significant to the proposed project including the work of key project personnel. Include preliminary data/information pertinent to the proposed project. All works cited should be referenced (see Bibliography & References Cited in Part IV, C. 4. d).

3) Rationale and Significance 
a. Concisely present the rationale behind the proposed project;  
b. Describe the specific relationship of the project’s objectives to one of the Program Area Priorities. Applications that do not address at least one Program Area Priority will not be reviewed; and  
c. The potential long-range improvement in and sustainability of U.S. agriculture and food systems should be shown clearly. These purposes are described under Purpose and Priorities in Part I, B. Any novel ideas or contributions that the proposed project offers should also be discussed in this section.

4) Approach  
The activities proposed or problems being addressed must be clearly stated and the approaches applied are to be clearly described. Specifically, this section must include:

d. A description of the activities proposed and the sequence in which the activities are to be performed;  
e. Methods to be used in carrying out the proposed project, including the feasibility of the methods;  
f. Expected outcomes;  
g. Means by which results will be analyzed, assessed, or interpreted;  
h. How results or products will be used;  
i. Pitfalls that may be encountered;  
j. Limitations to proposed procedures;  
k. A full explanation of any materials, procedures, situations, or activities related to the project that may be hazardous to personnel, along with an outline or precautions to be exercised to avoid or mitigate the effects of such hazards; and  
l. A timeline for attainment of objectives and for production of deliverables that includes annual milestones with specific, measurable outcomes.

➢ For Integrated Project Applications –

• Integrated Project applications must include at least two of the three functions of the agricultural knowledge system (i.e., research, education, and extension). Each function should be represented by one or more objectives within the application.  
• Projects must budget sufficient resources to carry out the proposed set of research, education, and/or extension activities that will lead to the desired outcomes. No more than two-thirds of a project’s budget may be focused on a single function.
Integrated Projects must include individuals on the project team with significant expertise in each component of the project (research, education, and/or extension).

A plan for evaluating progress toward achieving project objectives must be included. The plan must include milestones, which signify the completion of a major deliverable, event, or accomplishment and serve to verify that the project is on schedule and on track for successful conclusion. The plan should also include descriptions of indicators that you will measure to evaluate whether the research, education, and/or extension activities are successful in achieving project goals and in contributing to achievement of the stated program goals and outcomes.

In addition to the Project Narrative requirements above, the proposed Integrated Project should clearly articulate:

- Stakeholder involvement in project development, implementation, and evaluation, where appropriate;
- Objectives for each function included in the project (note that extension and education activities are expected to differ and to be described in separate project objectives; see enumerated descriptions in Part II, C.); and
- A dissemination plan describing the methods that will be used to communicate findings and project accomplishments.

AFRI encourages Integrated Projects that develop content suitable for delivery through eXtension. This content is for “end users” as opposed to staff development and must follow the eXtension Guiding Principles and guidelines for including eXtension in a proposal presented at http://about.extension.org/wiki/NIFA_RFA_Information. Funds may be used to 1) enhance an existing Community of Practice or 2) to establish a new Community of Practice, as appropriate.

AFRI encourages Integrated Projects that are suitable for 4-H audiences and stakeholder groups while meeting identified program priorities. The 4-H Youth Development is the programmatic outreach of the Land Grant Universities and Institutions to our youngest citizens in their communities and provides opportunities for youth to develop skills, practical knowledge, and wisdom with an emphasis on practical application of knowledge or “learning by doing.” By engaging 4-H in AFRI projects, applicants engage young people as citizen scientists; increase their awareness of the role of agriculture; and prepare young people for higher education and the 21st century work environment. Opportunities for engaging 4-H in AFRI proposals should align with the 4-H Mission Mandates of Science, Engineering and Technology; Healthy Living; and Citizenship. See guiding principles at www.national4-hheadquarters.gov or contact your university Cooperative Extension headquarters and/or State 4-H Program Office.

For Conference Grant Applications – In addition to the Project Narrative requirements above, substitute the following in the Approach section:

- A justification for the meeting;
- Recent meetings on the same subject with dates and locations;
- Names and organizational affiliations of the chair and other members of the organizing committee;
- A proposed program (or agenda) for the conference, including a listing of scheduled participants and their institutional affiliations; and
• The method of announcement or invitation that will be used.

For Sabbatical Grant Applications – In addition to the Project Narrative requirements above, substitute the following in the Approach section:
• A general description of the research, education, and/or extension interests and goals of the applicant in order to provide perspective for the application;
• A description of the project to be pursued while on the sabbatical leave;
• A statement of how the sabbatical leave will enhance the capabilities of the applicant; and
• A statement of future research goals and objectives once the sabbatical is complete and how the sabbatical will enable the applicant to pursue these goals.

For Equipment Grant Applications – In addition to the Project Narrative requirements above, include a general description of the project(s) for which the equipment will be used, how the equipment will fit into or enhance the research, education, and/or extension program, and how the equipment will allow the applicant to become competitive for future funding or move into new research areas. Also include a description of other similar or complementary equipment available to the PD at the institution and why the requested equipment is necessary.

For Seed Grant Applications – Include all of the components detailed in the Project Narrative section above and present enough detail to allow adequate evaluation. In order to be competitive, long-term goals and a statement describing how this Seed Grant will allow the applicant to become competitive for future funding must be included.

d. Center of Excellence Justification

Only CAP grants and standard grant applicants may be considered for COE designation.

In addition to meeting the other requirements detailed in Part IV, B., of this Request for Application (RFA), eligible applicants who wish to be considered as centers of excellence must provide a brief justification statement, as part of their Project Narratives and within the page limits provided, describing how they meet the standards of a center of excellence, based on the following criteria:

(A) the ability of the center of excellence to ensure coordination and cost effectiveness by reducing unnecessarily duplicative efforts regarding research, teaching, and extension in the implementation of the proposed research and/or extension activity outlined in this application;

(B) in addition to any applicable matching requirements, the ability of the center of excellence to leverage available resources by using public-private partnerships among agricultural industry groups, institutions of higher education, and the Federal Government in the implementation of the proposed research and/or extension activity outlined in this application. Resources leveraged should be commensurate with the size of the award;

(C) the planned scope and capability of the center of excellence to implement teaching initiatives to increase awareness and effectively disseminate solutions to target audiences
through extension activities in the implementation of the proposed research and/or extension activity outlined in this application; and (D) the ability or capacity of the center of excellence to increase the economic returns to rural communities by identifying, attracting, and directing funds to high-priority agricultural issues in support of and as a result of the implementation of the proposed research and/or extension activity outlined in this application.

Additionally, where practicable (not required), center of excellence applicants should describe proposed efforts to improve teaching capacity and infrastructure at colleges and universities (including land-grant colleges and universities, cooperating forestry schools, certified Non-Land Grant Colleges of Agriculture (NLGCA) (list of certified NLGCA is available at http://www.nifa.usda.gov/funding/pdfs/nlgca_colleges.pdf), and schools of veterinary medicine).

All work cited in the text should be referenced in this section of the application. All references must be complete; include titles and all co-authors; conform to an acceptable journal format; and be listed in alphabetical order using the last name of the first author or listed by number in the order of citation.

f. Field 10. Facilities & Other Resources – PDF Attachment. No Page Limit. Title the attachment as ‘Facilities & Other Resources’ in the document header and save file as ‘FacilitiesOtherResources’.

Describe available equipment. Items of nonexpendable equipment necessary to conduct and successfully complete the proposed project should be listed in Field C. of the R&R Budget and described in the Budget Justification (see section 6 below).

h. Field 12. Other Attachments

The following instructions are in addition to those noted in Part V 4.12 of the NIFA Grants.gov Application Guide.

1) Key Personnel Roles – PDF Attachment. 2-Page Limit. Title the attachment as ‘Key Personnel’ and save file as ‘KeyPersonnel’.

Ț For Integrated Grant Applications – state for key personnel an estimate of the percent of time devoted to research, education, and/or extension activities.
2) **Logic Model** – **PDF Attachment. Required for all Integrated Project applications. Allowable for Other Research Projects. 2-Page Limit.** Title the attachment as ‘Logic Model’ and save file as ‘LogicModel’.

Include the elements of a logic model detailing the activities, outputs, and outcomes of the proposed project. The logic model planning process is a tool that should be used to develop your project **before** writing your application. This information may be provided as a narrative or formatted into a logic model chart. More information and resources related to the logic model planning process are provided at [www.nifa.usda.gov/funding/integrated/integrated_logic_model.html](http://www.nifa.usda.gov/funding/integrated/integrated_logic_model.html).

The plan is to be clearly articulated and include an organizational chart, administrative timeline, and a description of how the project will be governed, as well as a strategy to enhance coordination, collaboration, communication, and data sharing and reporting among members of the project team and stakeholder groups. The plan must also address how the project will be sustained beyond termination of an award.

The management plan must also include an advisory group of principal stakeholders, partners, and professionals to assess and evaluate the quality, expected measurable outcomes, and potential impacts for the proposed research, education, and/or extension. Please include rationale for their role, and how they will function effectively to support the goals and objectives of the project. The plan must demonstrate how partners and stakeholders contribute to project assessment on an annual basis.

4) **Documentation of Collaboration** – **PDF Attachment. No Page Limit.** Title the attachment as ‘Documentation of Collaboration’ in the document header and save file as ‘Collaboration’.

Evidence, e.g., letter(s) of support, should be provided that the collaborators involved have agreed to render services. The applicant also will be required to provide additional information on consultants and collaborators in the budget portion of the application.

☀ **For Sabbatical Grant Applications** – Provide documentation that arrangements have been made with an established investigator(s) to serve as host, including:
- A letter from the home institution detailing the particular arrangements at the home institution with respect to salary and date and duration of sabbatical;
• A letter from the scientific host(s) indicating willingness to serve in this capacity and a description of the host's contribution to the proposed activities both scientifically and with regard to use of facilities and equipment; and
• A statement signed by the Department Head or equivalent official at the host institution indicating a commitment to provide research space and facilities for the period of the applicant's presence.

☼ For Equipment Grant Applications – The application must contain a letter(s) from the organization(s) committed to providing the non-Federal matching funds. Provide evidence of institutional commitment for operation and maintenance of requested equipment. Arrangements for sharing equipment among faculty are encouraged. However, it must be evident that the PD is a principal user of the requested equipment.

5) Preprints – PDF Attachment. Limited to 2 preprints. Title the attachment as ‘Preprints’ in the document header and save file as ‘Preprints’.

Preprints related to the Project Narrative are allowed if they are directly germane to the proposed project. Information may not be appended to an application to circumvent page limitations prescribed for the Project Narrative. Extraneous materials will not be used during the peer review process. Only manuscripts in press for a peer-reviewed journal will be accepted and must be accompanied by letters of acceptance from the publishing journals). Preprints attached in support of the application should be single-spaced. Each preprint must be identified with the name of the submitting organization, the name(s) of the PD(s), and the title of the application.

6) Minority-Serving Institution Documentation – PDF Attachment. Title the attachment as ‘Minorityinfo’ in the document header and save file as ‘Minorityinfo’.

   (a) Letter identifying percentage of applicable minority students.
   (b) Request for Determination – see Part III, B.

4. R&R Senior/Key Person Profile (Expanded)
Information related to the questions on this form is dealt with in detail in Part V, 5. of the NIFA Grants.gov Application Guide. This section of the Guide includes information about the people who require a Senior/Key Person Profile, and details about the Biographical Sketch and the Current and Pending Support, including a link to a suggested template for the Current and Pending Support.

A Senior/Key Person Profile should be completed for the PD and each co-PD, senior associate, and other professional personnel, including collaborators playing an active role in the project. Collaborators only providing services or materials should not be listed in the R&R Senior/Key Person Profile. Evidence (letters of support) for this type of collaboration should be provided in the Documentation of Collaboration (see Part IV, C. 4. g. 5).
a. **Project Role Field** – Complete appropriately.

- **For Sabbatical Grant Applications** – Select “PD/PI” for the Sabbatical Grant applicant. Select “Other” for the corresponding scientific host(s) and any other personnel whose qualification merit consideration in the evaluation of the application.

- **For Equipment Grant Applications** – Select “PD/PI” for the Equipment Grant applicant. Select “Faculty” for the other major users of the equipment.

b. **Other Project Role Category Field** – Complete appropriately, if applicable.

**Attach Biographical Sketch Field** – **PDF Attachment. 2-Page Limit** (excluding publications listings) per PD, co-PD, senior associate, and other professional personnel. Title the attachment as ‘Biographical Sketch’ in the document header and save file as ‘BiographicalSketch’.

A biographical sketch (vitae) of the PD and each co-PD, senior associate, and other professional personnel should be included.

The Conflict of Interest list should not be included in the biographical sketch, but it must be provided as a separate document (see Part IV, C. 8. c for more information).

- **For Sabbatical Grant Applications** – A Biographical Sketch must be submitted for the Sabbatical Grant applicant, the scientific host(s), and any other personnel whose qualifications merit consideration in the evaluation of the application.

- **For Equipment Grant Applications** – A Biographical Sketch for both the Equipment Grant applicant and other major users of the equipment must be submitted.

Current and Pending Support information is only required for personnel with PD or co-PD indicated as their Project Role on the R&R Senior/Key Person Profile. All applications must contain a list of all Current and Pending Support detailing public or private support (including in-house support) to which personnel identified in the application have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Please note that the project being proposed should be included in the pending section of the form. Total project listed for each PD should be indicated as percent effort and not exceeds 100% for concurrent (Current and Pending) projects.
The AFRI program will not fund an application that duplicates or overlaps substantially with other NIFA funding (including non-competitive funds such as Special Grants or Hatch formula funds) or other Federal funding. As an addendum to the Current and Pending Support, provide a brief summary for any completed, current, or pending projects that appear similar to the current application, especially previous NRI or AFRI awards.

- For Sabbatical Grant Applications – Current and Pending Support for both the Sabbatical Grant applicant and the scientific host(s) (as documentation of on-going work in the host’s laboratory) must be completed.

- For Equipment Grant Applications – Current and Pending Support for both the Equipment Grant applicant and other major users of the equipment must be completed. If the applicant has significant funding from other sources, a justification must be provided in the Project Narrative for how this equipment will strengthen the applicant’s research program or institution.

5. R&R Personal Data – As noted in Part V, 6. of the NIFA Grants.gov Application Guide, the submission of this information is voluntary and is not a precondition of award.

6. R&R Budget
Information related to the questions on this form is dealt with in detail in Part V, 7. of the NIFA Grants.gov Application Guide.

   a. If you conclude that matching funds are not required as specified under Part III, B. Cost-Sharing or Matching, you must include a justification in the Budget Narrative. We will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. NIFA retains the right to make final determinations regarding matching requirements.

For grants that require matching funds as specified under Part III, B., the Budget Narrative should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Written verification means:

1. For any third party cash contributions, a separate pledge agreement for each donation, signed by the authorized representatives of the donor organization (and the applicant organization ONLY if provided after submission of the application), must include: (1) The donor’s name, address, and telephone number; (2) the name of the applicant organization; (3) the title of the project; (4) the dollar amount of the cash donation (the budget narrative must describe how the cash donation will be used); (5) a statement that the donor will pay the cash contribution during the grant period; and (6) whether the applicant can designate cash as the applicant deems necessary or the cash contribution has been designated to a particular budget item.

2. For any third party in-kind contributions, a separate pledge agreement for each contribution, signed by the authorized representatives of the donor organization (and the
applicant organization ONLY if provided after submission of the application), must include: (1) The donor’s name, address, and telephone number; (2) the name of the applicant organization; (3) the title of the project; (4) a good faith estimate of the current fair market value of the third party in-kind contribution and a description of how the fair market value was determined; and (5) a statement that the donor will make the contribution during the grant period.

Summarize on a separate page the sources and amount of all matching support from outside the applicant institution and place that information in the proposal as part of the Budget Narrative. You must place all pledge agreements in the proposal immediately following the summary of matching support.

Establish the value of applicant contributions in accordance with applicable cost principles. Refer to OMB Circular A-21 (2 CFR Part 220), Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

b. Budget Periods. Applications must contain a budget for each budget period for the entire duration of the proposed project. Annual and cumulative budgets are required.

If a project is funded, beginning in the first year of funding, the project director will be required to attend annual investigator meetings for the duration of the award (excluding Conference, Sabbatical, and Equipment Grant applications). The project directors for Seed Grant applications are required to attend beginning in the second year of funding. The project directors for Exploratory Grant applications are required to attend the investigator meeting near the termination time of the award. Reasonable travel expenses should be included as part of the project budget.

- **For Integrated Project Applications** – Projects must budget sufficient resources to carry out the proposed set of research, education, and/or extension activities that will lead to the desired outcomes. No more than two-thirds of a project’s budget may be focused on a single component. Projects that include partnering with eXtension must include financial support for the Community of Practice core functions as well as project-specific activities.

- **For Conference Grant Applications** – The budget for the conference may include an appropriate amount for transportation and subsistence costs for participants and for other conference-related costs. Conference awards are not expected to exceed $50,000 and are not renewable. Indirect costs are not permitted on Conference Grant awards. Include an itemized breakdown of all support requested from the AFRI in the Budget Justification (Field K. of the R&R Budget).

- **For Sabbatical Grant Applications** – Limit to one year's salary and funds for travel and supplies.

- **For Equipment Grant Applications** – Each request shall be limited to one major piece of equipment within the cost range of $10,000-$250,000. Equipment grants are not renewable.
The amount of Federal funding requested shall not exceed 50 percent of the cost or $50,000, whichever is less. Grantees are required to match 100% of federal funds awarded from non-Federal sources. Unless waived, it is the responsibility of the PD to secure the required matching funds with non-Federal funds (see Part III, C for more information). No installation, maintenance, warranty, or insurance expenses may be paid from these awards, nor may these costs be part of the matching funds. Indirect costs are not permitted on Equipment Grant awards.

- **For Seed Grant Applications** – These awards will be limited to a total of $150,000 (including indirect costs) for two years and are not renewable.

- **Field H. Indirect Costs** – NIFA is prohibited from paying indirect costs exceeding 30 percent of the total Federal funds provided under each award. This limitation is equivalent to 0.42857 of the total direct costs of an award. See Part IV, E for additional information.

- **Field K. Budget Justification** – PDF Attachment. No Page Limit. Title the attachment as ‘Budget Justification’ in the document header and save file as ‘BudgetJustification’.

All cumulative budget categories, with the exception of Indirect Costs, for which support is requested must be individually listed (with costs) in the same order as the cumulative budget. NOTE: For continuation awards, all budget categories for year one must also be fully justified. If consulting, collaborative, or subcontractual arrangements are included in the application, these arrangements should be fully explained and justified. The rate of pay for any consultant must be included, if known at the time of application. Please include a cost breakdown for the consultant, including the number of days in service, travel, and per diem, as well as the rate of pay. Letters of consent or collaboration and other evidence should be provided in the Documentation of Collaboration (see Part IV, C. 4. g. 5) to show that collaborators have agreed to participate. A proposed statement of work, biographical sketch, and a budget for each arrangement involving the transfer of substantive programmatic work or the provision of financial assistance to a third party must be supplied. In multi-institutional applications, a budget and budget narrative must be included for each institution involved. The lead institution and each participating institution must be identified.

- **For Integrated Project Applications** – Each function should be represented by one or more objectives within the application. Projects must budget sufficient resources to carry out the proposed set of research, education, and/or extension activities that will lead to the desired outcomes. No more than two-thirds of a project’s budget may be focused on a single component.

- **For Equipment Grant Applications** – The Budget Justification should describe the instrument requested including the manufacturer and model number, if known; provide a detailed budget breakdown of the equipment and accessories required; and indicate the amount of funding requested from USDA for each component of equipment requested. A letter signed by the institution’s AR stating that the necessary non-Federal matching funds will be made available from an institutional or other source is required. An institution that
believes it is eligible for the waiver of the matching funds should include a letter stating and documenting the eligibility that is signed by the institution’s AR (see Table 2 following Part VIII for eligibility). A justification must be given for how this equipment will strengthen the applicant's research program or institution.

c. **Subcontract Arrangements**

If it will be necessary to enter into a formal subcontract agreement with another institution, financial arrangements must be detailed in the “R&R Subaward Budget Attachment(s) Form.” Annual and cumulative budgets, budget justification and a letter of commitment signed by the Authorized Representative (AR) are required for each subcontract agreement. Refer to Part V, 8. of the NIFA Grants.gov Application Guide for instructions on completing this form.

d. **Matching**

**Equipment Grants** requiring matching funds, as specified in Part III, C., must include a letter in the budget justification signed by the institution’s AR stating that the necessary non-Federal matching funds will be made available from the institution or other source. The amount of Federal funds provided may not exceed 50 percent of the cost of the equipment acquired using funds from the grant, or $50,000, whichever is less. Grantees are required to match 100% of federal funds awarded from non-Federal sources. If the institution believes it is eligible for the waiver for matching funds (see Part III, C. for waiver eligibility), the budget justification must include a letter signed by the institution’s AR stating this information. NIFA will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. NIFA retains the right to make final determinations regarding matching requirements.

If a funded project is commodity-specific and not of national scope, the grant recipient is required to match the USDA funds awarded on a dollar-for-dollar basis from non-Federal sources with cash and/or in-kind contributions.

The sources and the amount of all matching support from outside the applicant organization should be summarized on a separate page and placed in the application immediately following the Budget Justification. All pledge agreements must be placed in the application immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circular A-21 (2 CFR Part 220), Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

7. **Supplemental Information Form**

Information related to the questions on this form is dealt with in detail in Part VI, 1. of the NIFA Grants.gov Application Guide.
a. **Field 2. Program to which you are applying.** Enter the Program (Area Priority) Code Name and the Program (Area Priority) Code for the Program Area Priority to which you are applying from the information provided in the Program Area Descriptions beginning in Part I, C. An application can only be submitted to one program (Area Priority). It is extremely important that the Program (Area Priority) Code Name and Program (Area Priority) Code are spelled correctly and match this RFA. If you have a question about which topic area is appropriate for your application, please contact the Program Area Priority Contact.

b. **Field 8. Conflict of Interest List.** See Part VI, 1.8 of the NIFA Grants.gov Application Guide for further instructions and a link to a suggested template. A Conflict of Interest List is required for all applications submitted to the AFRI. The Conflict of Interest List should be provided as a separate PDF attachment and not included in the vitae or resume. A Conflict of Interest List must be completed individually for all personnel who have submitted a Biographical Sketch in the R&R Senior/Key Personnel Profile. **Collate all individual Conflict of Interest lists into a single document file.** The lists can only be submitted as a single PDF attachment.

C. Submission Dates and Times

Prior to electronic submission of the application via Grants.gov, it is strongly recommended that an administrative review be conducted to ensure that an application complies with all application preparation instructions. An application checklist is included in Part VII of the NIFA Grants.gov Application Guide to assist with this review.

**Instructions for submitting an application are included in Part IV, Section 1.9 of the NIFA Grants.gov Application Guide.**

Applications must be received by Grants.gov by **5 p.m. Eastern Time on April 30, 2015.** Applications received after this deadline will normally not be considered for funding.

If you have trouble submitting an application to Grants.gov, you should FIRST contact the Grants.gov Help Desk to resolve any problems. Keep a record of any such correspondence. See Part IV. A. for Grants.gov contact information.

We send email correspondence to the AR regarding the status of submitted applications. Therefore, applicants are strongly encouraged to provide accurate e-mail addresses, where designated, on the SF-424 R&R Application for Federal Assistance.

If the AR has not received correspondence from NIFA regarding a submitted application within 30 days of the established deadline, contact the Agency Contact identified in Part VII of the applicable RFA and request the proposal number assigned to the application. **Failure to do so may result in the application not being considered for funding by the peer review panel.**
Once the application has been assigned a proposal number, this number should be cited on all future correspondence.

D. Funding Restrictions

Section 716 of the Consolidated and Further Continuing Appropriations Act, 2015 (H.R. 83) limits indirect costs to 30 percent of the total Federal funds provided under each award. You should limit your request for the recovery of indirect costs to the lesser of your institution’s official negotiated indirect cost rate or the equivalent of 30 percent of total Federal funds awarded.

If your institution does not have, or cannot obtain, a negotiated rate, you must calculate an indirect cost rate in order to request indirect costs. You should calculate an indirect cost rate based on actual costs for the entire organization from the most recently completed accounting year. If no prior cost history exists, you should use budgeted costs for the entire organization. You should follow the example(s) found at: http://nifa.usda.gov/business/indirect_cost_process.html for information regarding this process.

You may elect not to charge indirect costs and, instead, use all grant funds for direct costs. If indirect costs are not charged, the phrase "None requested" should be written in this space.

Funds made available for grants under the AFRI program shall not be used for the construction of a new building or facility or the acquisition, expansion, remodeling, or alteration of an existing building or facility (including site grading and improvement, and architect fees).

E. Other Submission Requirements

You should follow the submission requirements noted in Part IV, section 1.9 in the document entitled “NIFA Grants.gov Application Guide.”

For information about the status of a submitted application, see Part III., section 6. of the NIFA Grants.gov Application Guide.
PART V—APPLICATION REVIEW REQUIREMENTS

A. General

We evaluate each application in a 2-part process. First, we screen each application to ensure that it meets the administrative requirements as set forth in this RFA. Second, a review panel will technically evaluate applications that meet these requirements.

We select reviewers based upon their training and experience in relevant scientific, extension, or education fields, taking into account the following factors: (a) The level of relevant formal scientific, technical education, or extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education, or extension activities; (b) the need to include as reviewers experts from various areas of specialization within relevant scientific, education, or extension fields; (c) the need to include as reviewers other experts (e.g., producers, range or forest managers/operators, and consumers) who can assess relevance of the applications to targeted audiences and to program needs; (d) the need to include as reviewers experts from a variety of organizational types (e.g., colleges, universities, industry, state and federal agencies, and private profit and non-profit organizations) and geographic locations; (e) the need to maintain a balanced composition of reviewers with regard to minority and female representation and an equitable age distribution; and (f) the need to include reviewers who can judge the effective usefulness of each application to producers and the general public.

When each peer review panel has completed its deliberations, the responsible program staff of Childhood Obesity Prevention RFA will recommend that the project: (a) be approved for support from currently available funds or (b) be declined due to insufficient funds or unfavorable review.

Childhood Obesity Prevention Area reserves the right to negotiate with the PD/PI and/or with the submitting organization or institution regarding project revisions (e.g., reductions in the scope of work, funding level, period, or method of support) prior to recommending any project for funding.

B. Evaluation Criteria

We will use the evaluation criteria below to review applications submitted in response to this RFA:

1. Integrated Project Applications
These evaluation criteria will be used for the review of all multi-function Integrated Project applications.

a. Merit of the Application for Science Research, Education, and/or Extension
   1. Project objectives and outcomes are clearly described, adequate, and appropriate. All project components (i.e., research, education, extension) – at least two are required – are reflected in one or more project objectives;
2. Proposed approach, procedures, or methodologies are innovative, original, clearly described, suitable, and feasible;
3. Expected results or outcomes are clearly stated, measurable, and achievable within the allotted time frame;
4. Proposed research fills knowledge gaps that are critical to the development of practices and programs to address the stated problem or issue;
5. Proposed extension leads to measurable, documented changes in learning, actions, or conditions in an identified audience or stakeholder group; and
6. Proposed education (teaching) has an impact upon and advances the quality of food and agricultural sciences by strengthening institutional capacities and curricula to meet clearly delineated needs and train the next generation of scientists and educators.

b. Qualifications of Project Personnel, Adequacy of Facilities, and Project Management

1. Roles of key personnel are clearly defined;
2. Key personnel have sufficient expertise to complete the proposed project, and where appropriate, partnerships with other disciplines (e.g., social science or economics) and institutions are established;
3. Evidence of institutional capacity and competence in the proposed area of work is provided;
4. Support personnel, facilities, and instrumentation are sufficient;
5. A clear plan is articulated for project management, including time allocated for attainment of objectives and delivery of products, maintenance of partnerships and collaborations, and a strategy to enhance communication, data sharing, and reporting among members of the project team; and
6. The budget clearly allocates sufficient resources to carry out a set of research, education (teaching), and/or extension activities that will lead to desired outcomes, with no more than two-thirds of the budget focused on a single project component. Supporting funds for Community of Practice core functions and project-specific activities are included for partnerships with eXtension.

c. Project Relevance

1. Documentation that the project is directed toward specific Program Area Priority identified in this RFA and is designed to accelerate progress toward the productivity and economic, environmental, and social sustainability of U.S. agriculture with respect to natural resources and the environment, human health and well-being, and communities;
2. Project components (research, education, and/or extension) – at least two are required – are fully integrated and necessary to address the problem or issue;
3. The proposed work addresses identified stakeholder needs;
4. Stakeholder involvement in project development, implementation, and evaluation is demonstrated, where appropriate;
5. Plan and methods for evaluating success of project activities and documenting potential impact against measurable short and mid-term outcomes are suitable and feasible;
6. For extension or education (teaching) activities, curricula and related products will sustain education or extension functions beyond the life of the project; and
7. For extension or education (teaching) activities, the resulting curricula or products share information and recommendations based on knowledge and conclusions from a broad range of research initiatives.

d. Center of Excellence Status
All eligible applicants will be competitively peer reviewed (as described in Part V, A. and B. of this RFA), and ranked in accordance with the evaluation criteria. Those that rank highly meritorious and requested to be considered as a center of excellence will be further evaluated by the peer panel to determine whether they have met the standards to be centers of excellence (Part III D. and Part IV B.). In instances where they are found to be equally meritorious with the application of a non-center of excellence, based on peer review, selection for funding will be weighed in favor of applicants meeting the center of excellence criteria. NIFA will effectively use the center of excellence prioritization as a “tie breaker”. Applicants that rank highly meritorious but who did not request consideration as a center of excellence or who are not deemed to have met the centers of excellence standards may still receive funding.

In addition, the applicant’s Notice of Award will reflect that, for the particular grant program, the applicant meets all of the requirements of a center of excellence. Entities recognized as centers of excellence will maintain that distinction for the duration of their period of performance or as identified in the terms and conditions of that award.

2. Conference Grant Applications
1. Relevance of the proposed conference to agriculture and food systems in the U.S. and appropriateness of the conference in fostering scientific exchange;
2. Qualifications of the organizing committee and appropriateness of invited speakers to topic areas being covered; and
3. Uniqueness, timeliness of the conference, and appropriateness of budget requests.

3. New Investigator Grant Applications
Refer to the review criteria listed above for the applicable Project Type (Research or Integrated) to which you are applying.

4. Sabbatical Grant, Equipment Grant, and Seed Grant Applications
1. The merit of the proposed activities or equipment as a means of enhancing the capabilities and competitiveness of the applicant and/or institution;
2. The applicant's previous experience and background along with the appropriateness of the proposed activities or equipment for the goals proposed; and
3. Relevance of the project to long-range improvements in and sustainability of U.S. agriculture, the environment, human health and well-being, and rural communities.

C. Conflicts of Interest and Confidentiality
During the peer evaluation process, we take extreme care to prevent any actual or perceived conflicts of interest that may impact review or evaluation. For the purpose of determining

Names of submitting institutions and individuals, as well as application content and peer evaluations, are kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process, to the extent permitted by law; therefore, the names of the reviewers will not be released to applicants.

D. Organizational Management Information

Specific management information relating to an applicant shall be submitted on a one time basis, with updates on an as needed basis. This requirement is part of the responsibility determination prior to the award of a grant identified under this RFA, if such information has not been provided previously under this or another NIFA program. We will provide you copies of forms recommended for use in fulfilling these requirements as part of the preaward process. Although an applicant may be eligible based on its status as one of these entities, there are factors that may exclude an applicant from receiving federal financial and nonfinancial assistance and benefits under this program (e.g., debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information).

E. Application Disposition

An application may be withdrawn at any time before a final funding decision is made regarding the application; however, withdrawn applications normally will not be returned. One copy of each application that is not selected for funding, including those that are withdrawn, will be retained by Childhood Obesity Prevention Challenge Area for a period of three years.
PART VI—AWARD ADMINISTRATION

A. General

Within the limit of funds available for such purpose, the NIFA awarding official shall make grants to those responsible, eligible applicants whose applications are judged most meritorious under the procedures set forth in this RFA. The date specified by the NIFA awarding official as the effective date of the grant shall be no later than September 30 of the federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. The project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by NIFA under this RFA may be used only for the purpose for which they are granted in accordance with the approved application and budget, regulations, terms and conditions of the award, applicable federal cost principles, USDA assistance regulations, and NIFA General Awards Administration Provisions at 7 CFR part 3430, subparts A through E.

B. Award Notice

The award document will provide pertinent instructions and information including, at a minimum:

(1) Legal name and address of performing organization or institution to whom the director has issued an award under the terms of this request for applications;

(2) Title of project;

(3) Name(s) and institution(s) of PDs chosen to direct and control approved activities;

(4) Identifying award number and the Federal Agency Identification Number assigned by NIFA;

(5) Project period, specifying the amount of time NIFA intends to support the project without requiring recompetition for funds;

(6) Total amount of financial assistance approved for the award;

(7) Legal authority(ies) under which the award is issued;

(8) Appropriate Catalog of Federal Domestic Assistance (CFDA) number;

(9) Applicable award terms and conditions (see http://www.nifa.usda.gov/business/awards/awardterms.html to view NIFA award terms and conditions);

(10) Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the award; and
(11) Other information or provisions deemed necessary by NIFA to carry out its respective
awarding activities or to accomplish the purpose of a particular award.

C. Administrative and National Policy Requirements

Several federal statutes and regulations apply to grant applications considered for review and to
project grants awarded under this program. These include, but are not limited to the ones listed
below.

2 CFR Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit
Requirements for Federal Awards.

2 CFR Part 400 — USDA implementation of 2 CFR Part 200, Uniform Administrative
Requirements, Cost Principles, and Audit Requirements for Federal Awards.

7 CFR Part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as
amended.

2 CFR Part 180 and Part 417--OMB Guidelines to Agencies on Government-Wide Debarment
and Suspension (Nonprocurement) and USDA Nonprocurement Debarment and Suspension.

7 CFR Part 331 and 9 CFR Part 121—USDA implementation of the Agricultural Bioterrorism
Protection Act of 2002.

2 CFR Part 416—USDA General Program Administrative Requirements for Grants and
Cooperative Agreements to State and Local Governments.

2 CFR Part 418—USDA implementation of Restrictions on Lobbying. Imposes prohibitions and
requirements for disclosure and certification related to lobbying on recipients of federal
contracts, grants, cooperative agreements, and loans.

2 CFR Part 421—USDA Implementation of Governmentwide Requirements for Drug-Free
Workplace (Grants).

2 CFR Part 422—Research Institutions Conducting USDA-Funded Extramural Research;
Research Misconduct.

7 CFR Part 3407—USDA procedures to implement the National Environmental Policy Act of
1969, as amended.

29 U.S.C. 794 (section 504, Rehabilitation Act of 1973) and 7 CFR Part 15b (USDA implementation of statute) —prohibiting discrimination based upon physical or mental handicap in federally-assisted programs.

35 U.S.C. 200 et seq. —Bayh Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in federally-assisted programs (implementing regulations are contained in 37 CFR Part 401).

D. Expected Program Outputs and Reporting Requirements

Grantees are to use REEport, NIFA’s electronic, web-based inventory system to submit an initial project initiation which documents expected products and outcomes of the project. Additionally, annual progress report documenting realized project outcomes must be submitted to the electronic system. The web-based system facilitates an electronic workflow between grantees and NIFA for project accomplishments to be easily searchable and allows for public access to information on Federally-funded projects. The details of these reporting requirements, including those specific to the annual and final technical reports, are included in the award terms and conditions.

If a project is funded, beginning in the first year of funding, the PD will be required to attend annual investigator meetings (excluding Conference, Sabbatical, and Equipment Grant applications). Seed Grant applications are required to attend beginning in the second year of funding. Reasonable travel expenses should be included as part of the project budget.
PART VII—AGENCY CONTACT

Applicants and other interested parties are encouraged to contact:

Programmatic Contact –

Dr. Deirdra Chester  
Title: National Program Leader  
Unit: Division of Nutrition  
Location: 3130 Waterfront Center  
Phone: 202-401-5178  
Email: dnchester@nifa.usda.gov

Dr. Jane Clary Loveless  
Title: National Program Leader  
Unit: Division of Nutrition  
Location: 3130 Waterfront Center  
Phone: 202-720-3891  
Email: jclary@nifa.usda.gov

Dr. Helen Chipman  
Title: National Program Leader  
Unit: Division of Nutrition  
Location: 2336 Waterfront Center  
Phone: 202-720-8067  
Email: hchipman@nifa.usda.gov

Administrative/Business Contact –

Rochelle McCrea  
Title: Team Leader, Team 1  
Unit: Awards Management Division  
Location: 2160, Waterfront Center  
Phone: 202 401-2880  
Email: rmccrea@nifa.usda.gov

Sondra Watkins  
Title: Team Leader, Team II  
Unit: Awards Management Division  
Location: 2170, Waterfront Center  
Phone: 202 401-4249  
Email: swatkins@nifa.usda.gov
PART VIII—OTHER INFORMATION

A. Access to Review Information

We will send copies of reviews, not including the identity of reviewers, and a summary of the panel comments to the applicant PD after the review process has been completed.

B. Use of Funds; Changes

1. Delegation of Fiscal Responsibility

Unless the terms and conditions of the award state otherwise, awardees may not in whole or in part delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of award funds.

2. Changes in Project Plans

a. The permissible changes by the awardee, PD(s), or other key project personnel in the approved project shall be limited to changes in methodology, techniques, or other similar aspects of the project to expedite achievement of the project's approved goals. If the awardee or the PD(s) is uncertain as to whether a change complies with this provision, the question must be referred to the Authorized Departmental Officer (ADO) for a final determination. The ADO is the signatory of the award document, not the program contact.

b. The awardee must request, and the ADO must approve in writing, all changes in approved goals or objectives prior to effecting such changes. In no event shall requests be approved for changes that are outside the scope of the original approved project.

c. The awardee must request, and the ADO must approve in writing, all changes in approved project leadership or the replacement or reassignment of other key project personnel, prior to effecting such changes.

d. The awardee must request, and the ADO must approve in writing, all transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not federal funds are involved, prior to instituting such transfers, unless prescribed otherwise in the terms and conditions of the award.

e. The project period may be extended without additional financial support, for such additional period(s) necessary to complete or fulfill the purposes of an approved project, but in no case shall the total project period exceed any applicable statutory limit or expiring appropriation limitation. The terms and conditions of award include information about no-cost extensions of the award and when ADO’s prior approval is necessary.

f. Changes in Approved Budget: Unless stated otherwise in the terms and conditions of award, changes in an approved budget must be requested by the awardee and approved in writing by the
ADO prior to instituting such changes, if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or award.

C. Confidential Aspects of Applications and Awards

When an application results in an award, it becomes a part of the record of NIFA transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be clearly marked within the application. The original copy of an application that does not result in an award will be retained by the Agency for a period of three years. Other copies will be destroyed. Such an application will be released only with the consent of the applicant or to the extent required by law. An application may be withdrawn at any time prior to the final action thereon.

D. Regulatory Information

For the reasons set forth in the final Rule related Notice to 7 CFR part 3015, subpart V (48 FR 29114, June 24, 1983), this program is excluded from the scope of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524-0039.

E. Definitions

Please refer to 7 CFR 3430, Competitive and Noncompetitive Non-formula Financial Assistance Programs--General Award Administrative Provisions, for applicable definitions for this NIFA grant program.

For the purpose of this program, the following additional definitions are applicable:

Director means the Director of the National Institute of Food and Agriculture (NIFA) and any other officer or employee of NIFA to whom the authority involved is delegated.

Food and Agricultural Science Enhancement (FASE) Grants mean funding awarded to eligible applicants to strengthen science capabilities of Project Directors, to help institutions develop competitive scientific programs, and to attract new scientists into careers in high-priority areas of National need in agriculture, food, and environmental sciences. FASE awards may apply to any of the three agricultural knowledge components (i.e., research, education, and extension). FASE awards include Pre- and Postdoctoral Fellowships, New Investigator grants, and Strengthening grants.
**Integrated project** means a project incorporating two or three functions of the agricultural knowledge system (research, education, and extension) around a problem or activity.

**Limited institutional success** means institutions that are not among the most successful universities and colleges for receiving Federal funds for science and engineering research. A list of successful institutions will be provided in the RFA.

**Minority-serving institution** means an accredited academic institution whose enrollment of a single minority or a combination of minorities exceeds fifty percent of the total enrollment, including graduate and undergraduate and full- and part-time students. An institution in this instance is an organization that is independently accredited as determined by reference to the current version of the Higher Education Directory, published by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, Virginia 22042.

**Minority** means Alaskan Native, American Indian, Asian-American, African-American, Hispanic American, Native Hawaiian, or Pacific Islander. The Secretary will determine on a case-by-case basis whether additional groups qualify under this definition, either at the Secretary’s initiative, or in response to a written request with supporting explanation.

**Multidisciplinary project** means a project on which investigators from two or more disciplines collaborate to address a common problem. These collaborations, where appropriate, may integrate the biological, physical, chemical, or social sciences.

**Small and mid-sized institutions** are academic institutions with a current total enrollment of 17,500 or less including graduate and undergraduate and full- and part-time students. An institution, in this instance, is an organization that possesses a significant degree of autonomy. Significant degree of autonomy is defined by being independently accredited as determined by reference to the current version of the *Higher Education Directory*, published by Higher Education Publications, Inc., 6400 Arlington Boulevard, Suite 648, Falls Church, Virginia 22042 (703-532-2300).

**Strengthening Grants** mean funds awarded to institutions eligible for FASE Grants to enhance institutional capacity, with the goal of leading to future funding in the project area, as well as strengthening the competitiveness of the investigator’s research, education, and/or extension activities. Strengthening grants consist of Standard and Coordinated Agricultural Project Grant types as well as Seed Grants, Equipment Grants, and Sabbatical Grants.

**USDA EPSCoR States** (Experimental Program for Stimulating Competitive Research) means States which have been less successful in receiving funding from AFRI, having a funding level no higher than the 38th percentile of all States based on a 3-year average of AFRI funding levels, excluding FASE Strengthening funds granted to state agricultural experiment stations and degree-granting institutions in EPSCoR States and small, mid-sized, and minority-serving degree-granting institutions. The most recent list of USDA EPSCoR States is provided in this RFA.

</table>

*Data obtained from the table of Federal obligations, including American Recovery and Reinvestment Act obligations for science and engineering research and development to universities and colleges, ranked by total amount received, by agency from the FY 2009 Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions (National Science Foundation).
Do you have an appointment at a State Agricultural Experiment Station or a degree granting institution?

- Yes

  Are you eligible for EPSCoR Funds?

  - Yes

    Eligible

  - No

    Not Eligible

- No

Are you at a minority-serving institution? See Part VIII, H for a definition.

- Yes

  Is your institution among the most successful (see Table 1)?

    - Yes

      Not Eligible

    - No

      Eligible

- No

  Is your institution small or mid-sized (total enrollment < 17,500)?

    - Yes

      Not Eligible

    - No

      Is your institution among the most successful (see Table 1)?

        - Yes

          Not Eligible

        - No

          Eligible
