

# An example of operationalizing the Parent/Family Guiding Principles

1. Social and Emotional Well-being of the Family
2. Positive Child Growth and Development
3. Advocating for Positive Home Environments
4. Positive Parent-Child Relationships
5. Couple Well-being

## 6. Family and Community Interface

The program promotes families connecting within the community to develop a social support system.

7. Supporting Professionals Working with Parents and Families

*The program will partner with other family-serving agencies in the community, including schools and faith-based organizations. Educators will stress the importance of a well-developed social support system and intentionally plan activities, events and opportunities so that families can experience doing things together in the community such as visiting local parks, libraries, and other community resource centers.*
