

## 2017 PD LIGHTENING TALKS

- Imagine you had 4 minutes to present your project to the Gates Foundation (what you were funded to work on & what you have found):
  - Some in the audience don't know anything about your area.
  - If the Gates Foundation likes what they hear, they will give you an additional \$2 million dollars to pursue this area of science.
- You have a **maximum of 4 slides & 4 minutes** to present your project and what it has accomplished to date (impacts/outcomes).
- You also will present a poster during session A or B, so focus only on key points in the lightning talk.

For each lightning session, all presenters will come to the front of the room at the beginning. Every 4 minutes a chime will ring and the next speaker will begin. All follow-up questions will be asked at your poster. Good luck in getting that \$2 million!
