

# Veterinarian Shortage Situation Nomination Form

To be submitted under the authority of the chief State or Insular Area Animal Health Official

**Veterinary Medicine Loan Repayment Program (VMLRP)**

This form must be used for Nomination of Veterinarian Shortage Situations to the Veterinary Medicine Loan Repayment Program (VMLRP), Authorized Under the National Veterinary Medical Service Act (NVMSA)

**Note:** Please submit one separate nomination form for each shortage situation. See the State Animal Health Official (SAHO) section of the VMLRP web site ([www.nifa.usda.gov/vmlrp](http://www.nifa.usda.gov/vmlrp)) for the number of nominations permitted for your state or insular area.

**Location of Veterinary Shortage Area for this Nomination**

Location of Veterinary Shortage: Bent, Kiowa, Prowers Counties  
(e.g., County, State/Insular Area; must be a logistically feasible veterinary practice service area)

Approximate Center of Shortage Area  
 (or Location of Position if Type III): Lamar, CO 81052  
(e.g., Address or Cross Street, Town/City, and Zip Code)

**Overall Priority of Shortage:** Critical Priority

**Type of Veterinary Practice Area/Discipline/Specialty (select one) :**

Type II: Private Practice - Rural Area, Food Animal Medicine (awardee obligation: at least 30% FTE or 12hr/week)

**For Type I or II Private Practice:**

- |   |  |

| <p><b>Must cover</b>(check at least one)</p> <p><input checked="" type="checkbox"/> Beef Cattle</p> <p><input type="checkbox"/> Dairy Cattle</p> <p><input type="checkbox"/> Swine</p> <p><input type="checkbox"/> Poultry</p> <p><input checked="" type="checkbox"/> Small Ruminant</p> <p><input type="checkbox"/> Other: _____</p> | <p><b>May cover</b></p> <p><input type="checkbox"/> Beef Cattle</p> <p><input checked="" type="checkbox"/> Dairy Cattle</p> <p><input checked="" type="checkbox"/> Swine</p> <p><input type="checkbox"/> Poultry</p> <p><input type="checkbox"/> Small Ruminant</p> <p><input type="checkbox"/> Other: _____</p> |
|---|--|

**For Type III Public Practice:**

Employer: \_\_\_\_\_ Position Title: \_\_\_\_\_  
 Please select **one or more** specialty/disciplinary areas:

Food Safety

Public Health

Epidemiology

Other: \_\_\_\_\_

(Optional) If the nominator wishes to specify a service time for this shortage situation that is higher than the minimum required for the shortage type checked above, please specify the percent time in the box below (based on a 40-hour work week). Leave the box blank if the service time for this shortage situation is for the minimum percent time of the shortage type indicated.

 %

Please describe the **importance and objectives** of a veterinarian filling this shortage situation as well as being located in the community, area, state/insular area, or position requested above (limit your response to 1500 characters).

This three county area in the south east corner of the state covers 4,971 square miles and approximately 173,000 food animals. There is not currently a veterinarian who goes on farm calls (either due to nearing retirement age, or other practice needs) therefore ranchers are having to haul their cattle to Kansas or La Junta, a minimum of an hour and half drive. Veterinarians not only manage the health of livestock but aid state and federal agencies in tracking livestock movement as well as mitigate disease outbreaks which can decimate not only livestock but also local economies making the veterinarian a linchpin for the community. Our objective is to find veterinarians that will provide access to animal health services for livestock to help in the early detection of foreign animal and zoonotic diseases affecting livestock and small animals; the seamless integration of animal and human health awareness and response throughout the community; and effective local and regional disease surveillance and reporting to support state and national disease monitoring efforts. Meeting this objective will improve food safety, animal health and public health, and will help Colorado maintain resiliency to outbreaks of foreign animal and zoonotic diseases.

Please describe the **activities** of a veterinarian meeting this shortage situation in the community, area, state/insular area, or position requested above (limit your response to 1500 characters or less).

The veterinary activities needed by the livestock producers in this three county area include:

- Provision of emergency veterinary services; for example livestock health care needs resulting from acute illness, trauma, dystocia or obstetrical difficulties
- Provision of routine veterinary services; for example vaccination, castration or dehorning
- Consultation in health care programs and nutrition
- Disease diagnostics for routine illness
- Disease surveillance and diagnostics for state and federal program diseases and for foreign animal diseases
- Completion of certificates of veterinary inspection and animal health testing requirements needed in order to ship livestock in interstate commerce
- Provision of reproduction management consultation and services

Please describe any past efforts to recruit and retain a veterinarian in the shortage situation identified above (limit your response to 750 characters or less).

This area hasn't had a lot of success in attracting new veterinarians interested in practicing large food animal. This is a very rural area of Colorado and considerable distance from any metropolitan areas of the State or from large population centers in Kansas. It has a high population of food animals but is extremely hard to recruit and retain veterinarians to any of the small towns within this very rural area. Financial incentives of the VMLRP would be helpful in the recruitment and retention of new veterinarians to this area. There are significant number of cow-calf producers in this location that need veterinary services to comply with State and federal animal health programs and to prevent and treat livestock diseases.

Please describe the risk of this veterinarian position not being secured or retained. Include the risk(s) to the production of a safe and wholesome food supply and to animal, human, and environmental health not only in the community but in the region, state/insular area, nation, and/or international community (limit your response to 2000 characters or less).

The risks associated with a lack of available veterinary services within a reasonable proximity of a producer's location in this area could include:

- A greater prevalence of disease, which increases the morbidity and mortality of food animals
- Reproductive losses, which would result in a monetary loss for the producer and the community
- The potential for the establishment and spread of a foreign animal disease due to the lack of timely surveillance and participation in Colorado emergency management activities
- The potential for the establishment and spread of a program or zoonotic disease due to the lack of timely surveillance and diagnostics
- A lack of the facilitation of interstate movement of animals through the issuance of a certificate of veterinary inspection or commuter agreements
- Adulteration of food products due to the producer's lack of knowledge on the proper use of pharmaceuticals and veterinary biologic products
- Increased production costs resulting from a lack of consultation on nutrition, proper herd management
- The inability to fulfill the requirements of the FDA Veterinary Feed Directive (VFD) would likely result in the lack of administration of medically important antibiotics to the livestock in the area and routine disease control

SAHO nominator must check both boxes below in order for NIFA to consider this nomination for official designation

- By checking this box, I affirm that this form represents a nomination and is subject to NIFA review and approval.
- By checking this box, I affirm that it is my professional opinion that this is a bona fide food supply or public health-related veterinary shortage situation. I affirm due diligence has been invested to identify this area as a shortage situation of at least moderate priority (severity).
