Veterinarian Shortage Situation Nomination Form

To be submitted under the authority of the chief State or Insular Area Animal Health Official

Veterinary Medicine Loan Repayment Program (VMLRP)

This form must be used for Nomination of Veterinarian Shortage Situations to the Veterinary Medicine Loan Repayment Program (VMLRP), Authorized Under the National Veterinary Medical Service Act (NVMSA)

Note: Please submit one separate nomination form for each shortage situation. See the State Animal Health Official (SAHO) section of the VMLRP web site (www.nifa.usda.gov/vmlrp) for the number of nominations permitted for your state or insular area.

Location of Veterinary Shortage Area for this Nomination

Location of Veterinary Shortage: County of Kauai, Hawaii
(e.g., County, State/Insular Area; must be a logistically feasible veterinary practice service area)

Approximate Center of Shortage Area
(or Location of Position if Type III): Lihue, Kauai
(e.g., Address or Cross Street, Town/City, and Zip Code)

Overall Priority of Shortage: Moderate Priority

Type of Veterinary Practice Area/Discipline/Specialty (select one) :

Type II: Private Practice - Rural Area, Food Animal Medicine (awardee obligation: at least 30% FTE or 12hr/week)

For Type I or II Private Practice:

- | | |
|--|---|
| Must cover (check at least one) | May cover |
| <input checked="" type="checkbox"/> Beef Cattle | <input type="checkbox"/> Beef Cattle |
| <input type="checkbox"/> Dairy Cattle | <input checked="" type="checkbox"/> Dairy Cattle |
| <input checked="" type="checkbox"/> Swine | <input type="checkbox"/> Swine |

| <input checked="" type="checkbox"/> Small Ruminant | <input type="checkbox"/> Small Ruminant |
| <input type="checkbox"/> Other: _____ | <input checked="" type="checkbox"/> Other: <u>aquaculture</u> |

For Type III Public Practice:

Employer: _____ Position Title: _____
Please select **one or more** specialty/disciplinary areas:
 Food Safety
 Public Health
 Epidemiology
 Other: _____

(Optional) If the nominator wishes to specify a service time for this shortage situation that is higher than the minimum required for the shortage type checked above, please specify the percent time in the box below (based on a 40-hour work week). Leave the box blank if the service time for this shortage situation is for the minimum percent time of the shortage type indicated.

%

Please describe the **importance and objectives** of a veterinarian filling this shortage situation as well as being located in the community, area, state/insular area, or position requested above (limit your response to 1500 characters).

The importance and objectives of the veterinarian in this shortage situation would be food animal veterinary practice with support for other endeavors such as companion animal practice (to supplement salary) and collaboration with University and State/Federal Officials regarding County Food Animal Health Issues. Currently there are ~140,000 cattle in Hawaii with ~16,000 on Kauai County where increases in beef and dairy production is being undertaken. Pigs are also a keystone of Polynesian culture and recent growth of the small ruminant sector and increasing aquaculture production will require food animal expertise. Kauai currently has a single veterinary practitioner willing to provide ~30% of her services to the livestock industries. With increased demand for local meat production and the need for greater food security for the islands, the primary objective will be to secure the veterinary services of a food animal practitioner for Kauai County. A secondary role will be to collaborate with University of Hawaii Extension personnel (Agents, Specialists, and Veterinarian) and with State/Federal Veterinary Officials related to food animal health.

Please describe the **activities** of a veterinarian meeting this shortage situation in the community, area, state/insular area, or position requested above (limit your response to 1500 characters or less).

The activities of the veterinarian in this shortage situation will be to provide food animal health expertise to Kauai County and its food animal producers. There are opportunities to supplement the salary of the individual with higher-paying fields such as companion animal practice with the State's growing population and their companion animals. The third area of activity for this veterinarian will be interaction with State/Federal Veterinary Officials and University of Hawaii Extension (Agents, Specialists, and Veterinarian) to contribute to initiatives to ensure food security and animal health. The veterinarian hired through the VMLRP will not have an appointment within the University or State/Federal agencies, but rather to be an active veterinary community member in this regard.

Please describe any past efforts to recruit and retain a veterinarian in the shortage situation identified above (limit your response to 750 characters or less).

Past efforts to recruit and retain a veterinarian for food animal practice has focused on involvement of pre- veterinary and veterinary students in local practices before they graduate in hopes of their return to the islands. However, most students do not return because of mainland job opportunities and the expense of living in Hawaii. Those that do return stay long-term with successful practices, although in companion animal practice due to higher salaries. The ability to recruit a high quality veterinarian with longevity for food animal practice would be greatly facilitated with the VMLRP to offset the high cost of living in Hawaii.

Please describe the risk of this veterinarian position not being secured or retained. Include the risk(s) to the production of a safe and wholesome food supply and to animal, human, and environmental health not only in the community but in the region, state/insular area, nation, and/or international community (limit your response to 2000 characters or less).

Food security is a tremendous issue for the geographically isolated islands of Hawaii in many regards. Hawaii imports vast amounts of food from around the globe, including products that could come from local food animal producers. Economically, the beef industry alone contributed over \$1.8 billion to the State in direct and indirect contributions in 2005. The national average of labor force employed by agriculture is 2%; however, Hawaii's agricultural labor force accounts for ~5% of the population pointing to the importance of these industries both culturally and economically. Additionally, Hawaii is a major location for tourism and importation of goods, making it susceptible to introduction of foreign and domestic animal disease and other animal health threats. Finally, Hawaii serves as a gateway of information and expertise for the Pacific Region and internationally for animal health with numerous visitors attending veterinary continuing education in Hawaii from around the Pacific and globe. If this position is not secured, a downturn in the capacity of Kauai County for livestock production could occur due to lack of veterinary expertise. Sustainable agriculture requires the inclusion of veterinarians to ensure animal health, food security, and support Pacific and International veterinary capabilities.

SAHO nominator must check both boxes below in order for NIFA to consider this nomination for official designation

- By checking this box, I affirm that this form represents a nomination and is subject to NIFA review and approval.
- By checking this box, I affirm that it is my professional opinion that this is a bona fide food supply or public health-related veterinary shortage situation. I affirm due diligence has been invested to identify this area as a shortage situation of at least moderate priority (severity).

Authorized State or Insular Area Animal Health Official or designee:

Name: Jason D. Moniz, D.V.M.

Title: Veterinary Program Manager

Organization: Hawaii Dept. of Ag., Div. of Animal

Email: Jason.D.Moniz@Hawaii.gov

Telephone Number: (808) 483-7106
(Area code required)

Public reporting for OMB control number 0524-0046 is estimated to average two hours, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a current valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to NIFA, OGF, 800 9th St. SW, Washington, DC 20024, Attention Policy Section. Do not return the completed form to this address.
