 Poultry
 Small Ruminant
 Other : _____

Type III Shortage: Public Practice (at least 49 percent time*)
Employer: _____ Position Title: _____
Please select **one or more** specialty/disciplinary areas.
 Food Safety
 Public Health
 Epidemiology
 Other: _____

Please describe the objectives of a veterinarian meeting this shortage situation as well as being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

Objectives: 1) Create a well-qualified pool of candidates from diverse backgrounds to serve as a private practice veterinarian delivering food animal veterinary service to portions of Delaware and Sullivan Counties in New York State. 2) Assure that talented students and graduates with aptitude for food animal practice are not prevented from serving due to financial constraints. 3) The person meeting this shortage situation will spend a minimum of 30% of their professional effort towards protecting the health of domestic livestock in food production.

Please describe the activities of a veterinarian meeting this shortage situation and being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

Delaware and Sullivan Counties are home to approximately 39,000 food animals and this population generates about 108 million dollars in cash receipts from livestock annually. According to Indiana Univ. (<http://www.ibrc.indiana.edu/innovation/interactive.asp?dpage=58>) Delaware is the third most rural county in New York and Sullivan is the 15th. We expect a veterinarian meeting this shortage to provide a full range of veterinary care to food producing animals in these counties and to play a crucial role in advising farmers how to optimize animal health, well-being and productivity. We expect this veterinarian to dedicate at least 30% of his or her professional efforts to food animal health and productivity.

Please describe any past efforts to recruit and retain a veterinarian in the shortage situation identified above (limit your response to 100 words or less).

Delaware County and Otsego County were listed as a shortage area in the 2010 VMLRP. That shortage was not filled.

Please describe the risk of this veterinarian position not being secured or retained. Include the risk(s) to the production of a safe and wholesome food supply and to animal, human, and environmental health not only in the community but in the region, state/insular area, nation, and/or international community (limit your response to 250 words or less).

Failure to alleviate the food animal veterinarian shortage in this area and other parts of New York will adversely impact individual animal health, human health, animal population health, animal well-being, and the economic viability of New York farms. The current limited availability of veterinary care leads to delayed treatment of injuries and medical conditions, lessens the likelihood of early detection of a serious animal disease outbreak, and leads to the premature loss of valuable animals. Veterinarians play crucial roles in helping farms use antibiotics and other animal medications properly. With increased concern over resistant bacteria and drug residues in food, the veterinarian will play a key role in food safety and consumer confidence. According to statistics available from the AVMA, (www.avma.org/fsvm/maps/ny.asp#animal_vet) there are no food animal practitioners within Sullivan County.

Please indicate whether you consider this situation/position a candidate for a "service in emergency" agreement (limit your response to 100 words or less). Please see solicitations for additional information regarding the obligation of participants who enter into the "Service in Emergency" agreement.

Authorized State or Insular Area Animal Health Official or designee:

Name: David C. Smith, DVM

Title: State Veterinarian

Organization: NYS Dept. of Agriculture & Markets,
Division of Animal Industry

Email: david.smith@agmkt.state.ny.us

Telephone Number: 518-457-3502
(Area code required)

Public reporting for OMB control number 0524-0046 is estimated to average two hours, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a current valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to NIFA, OEP, 800 9th St. SW, Washington, DC 20024, Attention Policy Section. Do not return the completed form to this address.

OMB Information Collection Approval No.: 0524-0046
Expiration Date: 8/31/2013
